D8636	Shiloka Thusoo	16/07/2026 13:09:45	Sir, my doubt is whether I should appear for UPSC 2027 or not:\n\nI've completed first reading of:\n\n1. Geography all components.\n2. Modern History.\n3. Laxmikanth\n\nOngoing:\n\n1. Economy (Ongoing- will be completed by Sept.)\n2. Optional (Ong- will be completed by Dec.)\n3. Current affairs (from monthly magazine.)\n\nIf my preparation is going well according to you for 2027 attempt, what should be my future strategy to maximise the outcome of the next few months.\n\nThank you, Sir. \nYour lectures are outstanding.\nI'll be the AIR-1 who says I have studied from Mrunal Sir.\n	These are reasonably good scores for a first reading — Geography, Modern History, and Laxmikanth done, with Economy and Optional on track by September and December respectively. Focus direction: Optional + remaining GS + Economy + Current Affairs, in that order of priority. Since you can already learn efficiently, apply this rule going forward: if you can finish a topic in 20 minutes by reading, there is no need to watch the 40-minute lecture — you are at a level where self-study can replace some video classes for topics you find easy. For the next few months: complete Optional by December 2026, complete remaining GS by February-March 2027, and start doing subject-wise PYQ analysis (not paper-wise) once each subject nears completion — this will show you exactly where you stand. For further polish once your core subjects are strong, watch this from the 19-minute mark: https://youtu.be/rbVcwhR7JzE?t=1140&si=k2ngWyd8aDLM2wmh All the best.

D8637	Madhuri Kushwaha	16/07/2026 21:00:56	never studied economy	Yes, you can sit in this course even if you have never studied economy before. Please watch the 4-minute timestamp of the Economy Intro & FAQ class (17th July 2026): https://unacademy.com/class/economy-intro-faq-about-course-1a1-money-vs-barter/WWV5NS89 You have to finish the entire course, Prelims and Mains, till December. Everything is covered — NCERT-level basics to advanced theory, current affairs, budget, schemes, and PYQs. There is no separate need to study NCERT beforehand.

D8640	jai shree shyam/ anaya kejriwal	16/07/2026 21:07:09	mujhe kaise padhu ki economy mera best ho jaye taki optional sub mai le saku	You do not need economy to already be strong before choosing it as your optional — the course itself will build you up from scratch. Please watch the 4-minute timestamp of the Economy Intro & FAQ class (17th July 2026): https://unacademy.com/class/economy-intro-faq-about-course-1a1-money-vs-barter/WWV5NS89 You have to finish the entire course till December — everything from NCERT-level basics to advanced theory, current affairs, and PYQs is covered. There is no

				separate need to study NCERT beforehand. Note: GS Economy and Economics Optional are related but separate preparations — completing PCB16 builds a strong base, but the Optional subject itself requires its own dedicated, separately-paid course and syllabus coverage.
D8641	NIKITA MISHRA	16/07/2026 21:08:33	optional subject is economy (how to prepare)	For preparing Economics as your optional subject: • First go through the syllabus and PYQs of Economics optional, and sit through free classes/YouTube videos to get a feel for it: Optional Teacher List — https://unacademy.com/content/optional-educators/ • Go through PYQs of the last 5-10 years topic-wise. • Browse recommended optional books on Google Books (sample pages only, don't buy yet) — see if you find the subject interesting enough to spend serious time with it. Note: Economics Optional is a separate beast. My PCB16/QEP9 courses cover GS Economy, which will help you but is not a substitute for a dedicated Optional course.
D8642	ABHANGWADKAR28	16/07/2026 21:09:01	how should i start preparing for my 2028 attempt? i am a beginner what exactly should i do and how should i go about it ?	Please go through my advice in the PCB16 Orientation Class (16th July 2026): • 20m: Deadlines to complete syllabus by December-end • 21m: Time management with college/job, too many daily lectures • 28m: Which subject to complete first Class URL: https://unacademy.com/class/upsc-orientation-strategy-roadmap/WV0Z4U9R

sr	name	date	Q.	ANS
				PCB16/QEP9 are explicitly designed to serve 2027/28/29 cohorts jointly — you do not need to wait for a future batch just because your target is 2028. As a beginner, focus first on core theory subjects (history, geography, polity, economy) over daily current affairs. Complete NCERT-level basics are covered within my course itself, so no separate NCERT reading is needed for economy. Rule of thumb: if you can learn a topic in 20 minutes by reading, skip the 40-minute video — but as a beginner, default to watching the lecture until you have a track record. All the best.

D8648	Nikhil Kumar	16/07/2026 21:11:08	sir i have your economy book by unacademy, so those economic book is enough or/and we will make running notes in live class ???	Ref to top section of this FAQ PDF titled 'Mrunal's Book vs Handout'. If your subscription is active, download the latest PCB16 handout — even if you have the book, the handout stays updated with current affairs. On live notes-making: this is a new initiative in PCB16 classes to help you memorise the outline of each topic and stay engaged during lectures. Ideally make these notes with pen and paper — this also builds writing stamina, useful later for Mains. However, these live notes are a supplement, not a substitute — you still need to read the PDF handout, since it contains all the facts required for the exam.

Q2) after the tough paper of 2026, you need to make changes in how you are preparing policy. How we should change our approach gives us secret tips? On Uttarakhand PCS in October: complete your core GS subjects (Geography, CSAT, Economy) first through this course — the same theory preparation applies broadly to State PCS exams as well. I have not seen Uttarakhand PCS papers specifically, so I cannot comment on state-specific portions; make an Excel file and do topic-wise PYQ analysis of that exam for more clarity.

Ans. why my teaching speed is fast: is explained in this video https://www.loom.com/share/9b374d30a18f457c8c1ff28007c58171 In coaching industry, many Teacher teach very Slowly, but they will never complete the syllabus. They will only complete first four chapters and randomly they will end the batch, and tell you to read remaining things from the books. I don't do that. I teach everything from 1st to last chapter. But I need to finish it within the given time limit that is 3.5-to-4 months. It is inevitable that the teaching speed will be fast.

If you can manage in English, prefer it for Mains — material is easier to find, process, and remember. Gujarati/regional-language books tend to be more contrived and complex, making revision harder. On the Interview: give it in English. Even broken English scores better on average than Hindi/regional mediums in the interview — क्योंकि टूटी-फूटी इंग्लिश वालों के भी हिंदी वालों से औसत ज़्यादा मार्क interview में आते हैं। You have the entire year ahead — use it to improve spoken English if needed. Prioritise core theory: money and banking, GDP concepts, monetary policy basics, and government schemes at a general-knowledge level — avoid deep-diving into nuanced UPSC-specific analytical topics, since CDS economy questions are more factual and basic in nature. D8669	mahesh	16/07/2026 22:03:05	Sir mai confused hu pre ka syllabus and mains ka syllabus ko lekar toh kaise kya karna hai\n	For my economy courses, you have to finish Pillar-1 of the Prelims course before attending Pillar-1 of the Mains course and its Pillar-1 Mains mock test — and the same pattern repeats for Pillar-2 through Pillar-6. The course follows a "ping-pong" structure: Pillar-1 Prelims, then Pillar-1 Mains, then back to Pillar-2 Prelims, and so on. You do not need to separately plan Prelims-syllabus-first-then-Mains-syllabus — the course sequencing handles this for you.

UPSC rules allow you to write GS and Essay papers in Gujarati while writing your Optional in English (or any other permitted combination) — you don't need to pick just one for everything. If thoughts genuinely don't come in Gujarati but you're comfortable enough in English otherwise, then write Mains in English — material is easier to find, process, and remember in English, and it saves you translation effort. This is not about which language is "correct" — it's about which one lets you express your preparation most effectively under exam conditions. You have time ahead to build comfort in whichever medium you choose; this decision is yours to make, and either way is workable if you commit to it.

Since you're from a Computer Science/software background with no prior humanities exposure, between Anthropology, Sociology, and PSIR — PSIR has a very high syllabus overlap with GS Paper 2 and current affairs, but it also requires heavy static + dynamic updation every year, which can be demanding for a working professional. Anthropology is comparatively compact, more static, and has a stable, scoring syllabus year on year — often better suited for someone with limited daily study time and no background in the humanities. Sociology is also compact and scoring, with reasonable GS overlap. Given your profile, I would lean towards Anthropology or Sociology over PSIR for ease of coverage. Anthropology Paper 1 has become tougher and more application-based in recent years — this is a general trend, not something specific to your preparation. D8698	Priyanshi Sharma	16/07/2026 22:58:13	sir, I did graduation in Geogrphy hons , enrolled in master's geogrpahy , targeting for 2027 but haven't started optional yet, what should be the perfect time to start optional as syllabus of geography is vast, how many months is sufficient to give for completing syllabus with answer writting.. \n\nThank you:)	With Geography honours and an ongoing master's, you already have a strong base — you can start optional preparation now, alongside GS, rather than waiting. Optional subject should always run parallel with GS, not after finishing GS — target completing the optional syllabus with answer writing by December 2026. Given Geography's vast syllabus, allocate consistent daily hours now rather than a fixed number of standalone months — starting immediately, in parallel with GS, is what matters most.
D8699	Pragya Singh	16/07/2026 22:58:21	Sir i am from law background ...and i thought of opting law as optional. i am currently in 5th year of my law school	I would recommend Law optional for law graduates, for the following Plan-B benefits: • Specialist officer (legal) roles in Bank/RBI etc. • Judicial services exam. • Corporate practice/private practice.

D8701	Itanshu	16/07/2026 23:01:12	Sir would we have to make notes of economics or you will give the pdf of notes ?	You get the complete PDF handout for economy — no need to make separate notes from scratch. The handout contains all the facts required for the exam.
D8702	Anishek	16/07/2026 23:01:30	sir my graduation subject is physics. so i want to pursue it through. I need your guidance, is it fine or should i go for other science subjects.	Physics is a reasonable optional choice if you have a strong hold on it from your graduation. One additional factor to check: if Indian Forest Service (IFoS) is part of your plan-B, having a science graduation subject like Physics also makes you eligible for that — so it works well on both fronts. No need to switch to a different science subject unless you have a specific reason to.
D8703	Xyz	16/07/2026 23:02:07	Sir is history good for optional subject??, because I have interest in history & I have strong hold on the subject	Yes, if you have genuine interest and a strong hold on History, it is a good optional choice — go ahead with it.
D8704	Astha Singh	16/07/2026 23:02:46	My graduation subject is Law, but I heard from seniors that its syllabus is very lengthy and is less scoring. I'm new to UPSC preparation and can study PSIR OR Sociology from scratch but these subjects are new to me but have more overlapping with GS subjects. And i dont hate law, it is interesting. So, what should i opt for optional.	It is true that in the last few years law optional did not deliver could result but 2025 onwards. It seems they have changed the scaling system so now law and all other such low profile options whether law or medical science are also doing well in terms of number of Toppers produced.. so ignore the negativity. Given that Law is genuinely interesting to you and you already have a

				graduation background in it, I would recommend sticking with Law over starting PSIR or Sociology from scratch. Law optional also has strong Plan-B value — specialist officer (legal) roles in Bank/RBI, judicial services exam, and private/corporate practice. Starting an entirely new subject as a beginner adds unnecessary learning curve when you already have a natural advantage in Law.

				• If you can learn a topic in 20 min by reading, skip the 40-min video meant for weaker students. In my economic courses, watch videos for bitcoin, money supply, monetary policy, GST, income tax, currency exchange, and GDP formulas; other topics can be studied from handouts if time is short and you're sharp enough. • Limit lectures to 5 hours/day; use remaining time for reading/self-study. • Beginners should prioritize core theory subjects (history, geography, polity, economy) over daily current affairs videos. Complete these first. • Complete major milestones: optional by Dec 2025, most GS (Prelims+Mains) by Feb 2026. If not possible, especially for non-EWS general category aiming for IAS, consider the next year's attempt. • If you have a paid optional subject subscription, complete it first; other subjects like science can be managed via self-study, free classes, or YouTube. • If struggling with batches, unenroll and focus on 2-3 subjects daily. No extra fees for Unacademy batches; it's like managing a Netflix watchlist. • Use free NCERT audiobooks while traveling: https://ciet.ncert.gov.in/audio-books • Use office breaks for newspapers; mornings for subject study. • College students/working professionals should skip daily current affairs videos, focus on theory, and limit newspaper time to 30 min. Unacademy's 1-hour current affairs classes target different students. • Mains: 90 Days Roadmap: https://youtu.be/DRorb5TquXA?si=e4HjB9l4-0imeZSa

D8741	Abhishek	16/07/2026 23:24:23	I am 31 years old. Doing job in central govt. I know I am too late, many of my friends opposed the idea. But i always wanted to crack UPSC CSE if not crack then atleast give it huge try and gain some post. It might happen that you think I may be waisting my time but I am serious and I will try fully to give my full strength to this exam. So, my question is about Optional as for GS part Mrunal Sir answered my many a doubts - I am confused about optional. I am a Computer Science Engineer. I have decided to take Geography as optional. Now, Sir, If you may guide any thing other than this. Because I am a little confused as you said in the last class about what optional to choose and what is it success rate. 2nd subject I was thinking about Anthropology and 3rd subject last PSIR. Thank You. Let's crack it.	optional geography requirs lot of memorization bcoz they ask places to be marked in map. see PYQs and If you're comfortable with that , then stick to it, else you can explore the remaining two subjects that you have listed. If I can get the notes then I won't need lectures to watch.	Commerce as an optional doesn't require a live educator if you're comfortable studying independently — a CA background gives you a real edge there. You should definitely take the optional subject as a Chartered Accountant.

I am well informed about geology, but 1-2 small sub-subjects in geology are on weaker side. Geology gives me an upper hand in geography also and it is getting covered in GS. So which one i should go for?	Geology (your PG subject) is the stronger pick here — your existing command in it directly gives you an edge, and it also overlaps with Geography which helps in GS. Weakness in 1-2 sub-topics can be closed with focused revision; that alone isn't a reason to switch to Geography from scratch. Optional Teacher List: https://unacademy.com/content/optional-educators/

D8777	Vibhu Bharti	16/07/2026 23:35:37	Hi sir, this was my 3rd attempt (2026) but somehow i didn't get through. And there is one important thing that i only attempt for upsc cse. From a x institute i studied hindi literature but i am thinking of changing it. I need your guidance over here. In unacademy i am subscriber of iconic pro.	Sorry to hear about the 3rd attempt not working out. On changing your optional from Hindi Literature: go through the syllabus and PYQs of your alternative choices before deciding, rather than changing based on this attempt's result alone. D8778	Rakesh Sh	16/07/2026 23:35:44	I am currently working in private sector and cannot quit. I get 3 hours in the morning and 3 in the evening with 7 hours sleep. Enrolled in Aagaz batch, course started in July 2026. Feeling time crunch watching 2 lectures consuming 4-5 hours. Alongwith this, I am currently choosing optional but need help, if possible. I am a B.Tech in ECE. Was suggested and tried sociology but didn't find it to my liking. With few attempts left I am inclining towards Anthropology, Psychology or some other shorter optional with good scoring capability. Kindly help me out, please.	With 6 hours/day available, 2 lectures taking 4-5 hours is a genuine time crunch — you don't have to watch every lecture at full length; if you can grasp a topic in 20 minutes by reading, skip the 40-minute video for that portion, provided you're confident in doing so given your prior attempts. On optional: since Sociology didn't suit you, Anthropology and Psychology are both reasonable to explore as shorter, well-scoring alternatives. Go through syllabus and PYQs of both before finalising. Optional Teacher List: https://unacademy.com/content/optional-educators/ # Time management ke liye Rule of thumb: • If you can learn a topic in 20 min by reading, skip the 40-min video meant for weaker students. In my economic courses, watch videos for bitcoin,

				money supply, monetary policy, GST, income tax, currency exchange, and GDP formulas; other topics can be studied from handouts if time is short and you're sharp enough. • Limit lectures to 5 hours/day; use remaining time for reading/self-study. • Beginners should prioritize core theory subjects (history, geography, polity, economy) over daily current affairs videos. Complete these first. • Complete major milestones: optional by Dec 2025, most GS (Prelims+Mains) by Feb 2026. If not possible, especially for non-EWS general category aiming for IAS, consider the next year's attempt. • If you have a paid optional subject subscription, complete it first; other subjects like science can be managed via self-study, free classes, or YouTube. • If struggling with batches, unenroll and focus on 2-3 subjects daily. No extra fees for Unacademy batches; it's like managing a Netflix watchlist. • Use free NCERT audiobooks while traveling: https://ciet.ncert.gov.in/audio-books • Use office breaks for newspapers; mornings for subject study. • College students/working professionals should skip daily current affairs videos, focus on theory, and limit newspaper time to 30 min. Unacademy's 1-hour current affairs classes target different students. • Mains: 90 Days Roadmap: https://youtu.be/DRorb5TquXA?si=e4HjB9l4-0imeZSa

This is a common revision-retention issue. Follow this revision flow for economy: • Reading1: morning after the last night class • Revision1: before weekly test • Revision2: before the Mega Test (100 MCQ from all handouts) — 14th December 2026 • Revision3/4: February to May — paced via the Win27 series (2 classes per month till May) • Final glance before Prelims: glance over index pages of each chapter; only if you cannot remember something, go through the actual content. फिर भी आपको याद नहीं रहता तो अपने शब्दों में लिख लिखकर नोट्स बनायीये। Now shift your focus to other subjects — more economy revision beyond this point will give diminishing returns. Also, while practicing PYQs, read each statement carefully and avoid overthinking/second-guessing (Birbal ki Khichdi) — that itself causes many silly wrong marks despite knowing the concept.

Q1 (sequence): Your current sequence (Geography + Environment + Economy in parallel) is fine — no need to change it at this stage. Q2 (PYQ analysis): It takes time to get used to how UPSC frames statement-based MCQs — mainly involves recognising changed keywords and using the elimination method. This becomes faster with practice; ultimately it requires memorisation of facts and concepts — tricks alone cannot carry you through every MCQ. Q3: Yes, my Prelims (PCB16) and Mains (QEP9) economy courses are designed as an integrated pillar-wise approach — Pillar-1 Prelims, then Pillar-1 Mains, and so on. Q4 (Mains start): Complete the Prelims economy course first before starting Mains — mains assumes familiarity with prelims-level concepts.

sr	name	date	Q.	ANS
				Q5: Full-length mock tests should be done in March-May, after theory + PYQ + revision is complete — not now. Doing them too early wastes time and can be demotivating. D8809	unacademy_ashutosh189	17/07/2026 09:42:46	At present, only Anthropology has been started. What about the other optional subjects? When are they expected to begin? If they are not introduced soon, how will aspirants make an informed decision regarding their optional subject?\n\nThe Anthropology lectures are excellent, but once the other optional subjects are launched, we will have a better strategic perspective on which optional best suits our strengths and interests.\n\nAs of now, the	optional subject business is such that every subject can't be launched unless there sizeable amount of students for it to justify fees vs faculty payouts. so some going live , some being sold in recorded mode. here is Optional Teacher List https://unacademy.com/content/optional-educators/

			optional subject selection seems somewhat one-sided, as there is no opportunity to evaluate or compare other options. Therefore, I kindly request you to start the live lectures for the remaining optional subjects as well, so that aspirants can make a well-informed and confident choice.

However, note that live classes are taught in the context of the latest Prelims-2026 analysis and current affairs framing by all teachers right now; recorded videos from an earlier batch will not carry that specific framing, so supplement with the PCB16 Orientation Class for that context: https://unacademy.com/class/upsc-orientation-strategy-roadmap/WV0Z4U9R On pace: normally one should not watch more than 5 hours of lecture per day — use the remaining time for reading/self-study rather than trying to match the live daily schedule lecture-for-lecture.

Since you like your graduation subject, stick with Commerce. Known devil is better than unknown devil — Commerce also gives you Plan-B options like State PSC exams for commercial tax inspector, excise assistant commissioner, and accounts officer roles. In CSE-2020, toppers with Commerce had a 13% success rate versus 8% for PSIR — Commerce is a decent, well-performing optional. Even without having studied it seriously in college, enough guidance and material is available today. The choice of optional has no bearing on your service choice either. You can also explore UGC NET and a college professor career as Plan-B.

History is a reasonable choice given your background — a weak Modern History alone should not be a dealbreaker, since it can be built up like any other segment through the course/handout. Given your Psychology graduation background, it is a reasonable optional choice — no need to worry that you currently have zero subject knowledge, that is normal starting point for most students. I'm ready to do hardwork bass mujhe 1st attempt main hi acchi khasi rank chahiye, aap lok gurus toh ho hi, aaplogoka blessings bhi chahiye. Regards.	A single good demo class creating fresh excitement is common — that alone doesn't necessarily mean romanticizing, but it's worth checking properly before switching. Go through the full Geography syllabus and PYQs, not just the one class, and be honest with yourself: Geography optional requires a lot of memorisation, since they ask you to mark places on the map. If your health allows you to complete Prelims syllabus (economy + polity) and revision comfortably by early 2027, appear for 2027 Prelims. If Mains preparation is genuinely uncertain due to health, you can still attempt 2027 Prelims as practice and exposure — clearing or not clearing does not close the door on 2028. Focus on what is controllable: complete the remaining subjects and revision at a pace your health allows, and take the Prelims call closer to the date based on actual syllabus status at that time, not right now. all the best.
D8841	Samiksha Jain	17/07/2026 13:15:48	Sir I have completed my graduation this year , I have given cuet pg exam for LLB, I got selected in DU , and I planned my first attempt in 2027, I started preperation one year back,I have seen too many lectures , I completed courses ...still many things are left , specially optional , I have started this month (PSIR)..and revision , some subjects ...so I want to ask... SHOULD I appear in 2027 exam ,,,,SHOULD I JOIN DU	On the 2027 exam decision: this depends on syllabus completion, not just how many lectures you've watched. Please go through the deadline discussion at the 20m timestamp in the PCB16 Orientation Class (16th July 2026): https://unacademy.com/class/upsc-orientation-strategy-roadmap/WV0Z4U9R. If you can realistically complete optional (PSIR), remaining subjects, and revision by the syllabus deadlines discussed there, go for 2027. Otherwise, use 2027 as a serious attempt regardless and plan 2028 as the backup rather than skipping 2027 altogether. On joining DU for LLB — that depends- if you don't join it and sit at home, will your family be supportive ? or will joining DU and using their hostel / library will help you focus more on studies? etc these are the personal factors you have to consider before taking decision. all the best.

So now I've started completing geography and history (did physical geo and world history). And I'm a college student (B.com) so I've decided to go with 2 subjects at a time to keep it manageable. \n\nSo my question is, now that these 2 courses are done, should I go with economy and polity course? Or keep completing other courses of geography and history first, then shift to polity and economy?\n\nBecause if I start economy and polity now, new geography and history courses start again too and I can't go with 4 subjects at a time. \n\nPlease help.	With 2029 as your target and two subjects at a time as your working method, you have adequate runway — no need to rush all four subjects together. For question on current affairs notes making > How to approach current affairs for UPSC? Please go thru my advice at the 14m timestamp in the PCB16 Orientation Class (16th July 2026): https://unacademy.com/class/upsc-orientation-strategy-roadmap/WV0Z4U9R then, • Your first priority should be to complete the subjects such as economy, polity, history, geography, environment and science. • All the good teachers already incorporate large amount of current affairs inside their course it self for example my economy course.

				• So beyond that, very fractional amount of current affairs need to be prepared by yourself. and even that is covered free of cost through special classes e.g. my win27 series next year for economy. • Additionally, you can take help of the monthly current affairs magazines such as this https://unacademy.com/content/upsc/downloads/ • for completing the current affairs of earlier months.ideally for pre-2027, u should read from 1/1/2025 onwards ke magazines (=two calendar years). • there is no need to make a Notes out of current affairs as such because most of the free monthly magazines will be covering it. However, if you find some unique information relevant for your optional-subject, interview questions related to your graduation or your domicile state or Ethics or Essay then you should note it down from newspaper. otherwise no need to note it down. • You should also keep habit of reading the newspaper columns for at least four months to cultivate vocabulary e.g. • English medium = Indianexpress/thehindu (Any single newspaper. not both) • Hindi = Jansatta. however to improve yourself, u can buy thehindu book of editorials- which is available on thehindu publication's website. • lastly, how to handle newspaper effectively? https://youtu.be/boW-QoExVsc?si=lKGnyT2BsZq-AsDG Should I watch daily current affairs videos or not? Unacademy is like five star hotel so it provides all the facilities depending on the requirement of the customer. For example, welcome drink is given in the lobby and you're not thirsty, then you don't have to drink it. If you're thirsty, you should drink it. Similarly, a repeater student who has already completed the theory subjects and only wants to update himself with daily current affairs. He may be requiring

D8853	Sohan Roy	17/07/2026 14:58:08	I just passed class 12 with commerce. I will take optional among Commerce and Accountancy, Economics and Management.\nBut, in commerce and accountancy there are many maths and it will take much time. So, I want to choose between Economics and Management.\nSir, i want to know your opinions on it.	One practical note: Economics as an optional comes with its own thinkers, theories, graphs, and maths — go through the syllabus properly before assuming it will be lighter than Commerce/Accountancy. in my opinion, known Devil is better than unknown devil.

				⚒ Commerce as optional? If you're a commerce graduate then Why not take Commerce as an optional that can also help you in State PSC exams for commercial tax inspectors / excise assst. commissioners etc? known devil is better than unknown devil. in CSE-2020 toppers with commerce = 27/210 = 13% success rate toppers with PSIR = 154/1863 = 8% success rate. toppers with philosophy = 20. If you're a commerce graduate then Why not take Commerce as an optional that can also help you in State PSC exams for commercial tax inspectors / excise asst. commissioners / accounts officer class-1 etc? Even if you did not study commerce seriously during college years, enough guidance/material available in today's age. And Commerce is also among decent optional subject, giving good results. The choice of optional subject has no bearing on your service choice. Even if you opt for foreign service as first preference, the Interview panel is not going to grill you for 30 minutes on foreign relations / IR. they'll ask u other qs from ur biodata as well.

As there is not much coaching or material available in the market but as per my knowledge and books available during my studies, i think i can go for it. What is your opinion regarding Geology as optional.	For low-popularity optionals like Geology, do a topic-wise analysis of PYQs, take a printout of those topic-wise questions, and show it to the head of the Geology department at a reputed college — seek their opinion on the booklist and answer-writing style. For answer writing, start with PYQ answer writing first. Given your DU Geology background, your subject-matter foundation is strong; the main risk with low-popularity optionals is chasing hard-to-find guidance rather than the subject itself.

Since this is a self-study attempt without a live batch behind you so far, prioritise: (1) complete PCB16/QEP9 syllabus for economy fully with the weekly tests, (2) go through the deadline and time-management advice in the PCB16 Orientation Class (16th July 2026): https://unacademy.com/class/upsc-orientation-strategy-roadmap/WV0Z4U9R, (3) do honest revision cycles rather than rushing new topics this late. D8872	Satyadeo Patel	17/07/2026 18:33:24	Namaste sir, Sir I completed my graduation in 2023 thereafter approx 1 year I worked (intership+ job) in IT sector because of very less salary and uncertain future I left my job ,then at that time there is huge job opportunities in BPSC TRE , teacher exam conducted in regular basis I already cleared STET 2025(Bihar TET) but the vacancy are delayed (may be political instability in State) , I planned after taking Teacher job I will start preparing for UPSC CSE but because of delay in exam and as I already cover the syllabus of TRE 4 , I start my preparation for CSE , presently I following Sudarshan sir for geography (physical geography completed) for economics I started following your classes , and for history i previously completed from Arti mam . But sir Probably the TRE prelims is going to be held in the month of November	If your CSE Mains preparation (60-70%) is well on track, focus fully on CSE and treat TRE as secondary — do not let TRE mocks/revision eat into CSE prep time this close to your CSE cycle. If CSE prep is still well behind, then going for TRE alongside makes sense as a genuine Plan-B/income option, since you've already covered its syllabus once. Given you've completed TRE 4 syllabus already, light revision + mocks for TRE without disturbing your CSE class schedule is reasonable — just don't let it become a second full preparation track.

			and the TRE mains in April month\n\nSir My question is should I only focused on preparing for CSE syllabus and left the TRE exam or should I go for parallel teacher exam preparation (revision and mocks) along with unacademy CSE classes	
D8873	Tejas.p	17/07/2026 18:35:19	Sir my question is after completing your economic lecture for prelims and main. How much will it cover for optional economic paper (basically how much more i need to study for optional economic paper)	My Prelims and Mains GS economy courses (PCB16/QEP9) cover the GS syllabus only — they do not prepare you for the Economics Optional paper. Optional Economics is significantly more advanced and mathematical (economic theory, econometrics-adjacent concepts, growth models) than what GS economy covers. If you choose Economics as your optional, you will need to prepare that separately and substantially beyond the GS course. Optional Teacher List https://unacademy.com/content/optional-educators/

Optional subject core theory does not change year to year the way current affairs does; 4-5 year old lectures are usable as long as you supplement with recent PYQs. Physics: same point applies — older lectures are workable if the syllabus is fundamentally the same, but your own comfort level with Physics theory (not just problem-solving) matters more here.

			lekin dusre din dusara optional ka khayal aane lagta he ,vaise to mujhe Economics bhi accha lagta he aur samaj bhi aata he lekin uska bhi educator ka Issue he Unacademy pr 4 5 sal purane lectures available he.mene mere core subject aik aik bar to padh liye he ab revision bhi kr rahi hu aur mujhe mera optional december tr khatam karana he please sir me for selecting optional	Public Administration: the fact that your interest fluctuates day to day is a sign it isn't a strong enough pull yet — don't choose it hoping the interest will firm up over time. Given you've already completed one full reading of your core GS subjects and are revising, and Economics is both understood and genuinely liked by you, that would be my lean — but go through PYQs of Economics optional once before finalising, since it is noticeably more technical than GS economy. Nearly my entire family and extended family is of Bureaucrats that were selected in first attempt and expect the same of me, the pressure is immense and I need to ensure I get at least some sort of Service even if not IAS on the first attempt itself, I'd really	On the pressure: exam results depend on your own preparation and revision quality, not on family history. Focus on your own numbers and syllabus completion — that is the only thing within your control, and worrying about family expectations will not add marks. On optional, narrowing your five options: Maths is considered among the top five best-performing optional subjects, and given your NIT background and comfort with practice-based problem-solving, it is a serious contender — go through its syllabus and PYQs. Since you mentioned wanting to lean on strength in one paper rather than both, note that Maths Optional has two papers of comparable difficulty, so check both syllabi before assuming this halves your effort.

I am thinking to take maths due to my good preparation in one of the papers syllabus not both, I am torn between the choice of Maths, Anthropology, Sociology, Agriculture and History. March Tak uske bad optional decide karungi sir pls aapka suggestion dijiye\nThank you.	Economics as optional • Economics, as an optional subject, comes with its own thinkers, theories, graphs, maths, etc may not feel as interesting or exciting as you find in it for GS bcoz of simpler topics, like Repo rate, GDP and GST. • so go through the syllabus, PYQ and take a decision accordingly. • Ideally is meant for people who have done graduation or post graduation in economics as an optional • Optional Teacher List • https://unacademy.com/content/optional-educators/ If you are not comfortable working with English-medium optional material at all, then Geography / socio etc are safer, better-supported choice in Hindi medium. D8883	PURNIMA SONI	17/07/2026 19:53:47	Sorry sir asking this out of context, but till now I wasn't aware about this and only got to know through your orientation lecture that OBC certificate should be made as per Paternal's domicile state. My father was born and brought up in RJ and later shifted to MP for job. My mother hail's from MP and they married and got settled in MP. I was born and did all of my schooling, graduation from MP and then I along with my Family shifted to Vadodara, GJ, 8 years back due to my job. My father is retired. We now own a house here, and got our adhaarr updated with Vadodara's address. We do not own any property in RJ / MP. So my Central OBC certificate should be made considering which state as Father's domicile? Currently I am having Central OBC certificate through MP state, as I was born and studied there.	This is a specific certificate-eligibility question tied to your family's exact domicile and relocation history, so I would not want to give you a generated answer that could be wrong on something this consequential. Please verify this with the concerned district / tehsil officials.
D8884	Nidhi Kumari	17/07/2026 19:54:37	Sir i am very much confused about my optional as i want to opt for english literature because i have a backround in it ,have done my graduation and postgraduation in english literature, but the recent trend suggests that their is no such good scope in it so kindly suggest me what should i do.	With a graduation and post-graduation in English Literature, that background match is strong — a subject match this direct is rare, and toppers exist in every optional regardless of how 'trendy' it currently is. Recent scope perception changes year to year and should not override a genuine subject-mastery advantage. Go with English Literature. It will save you the time and trouble in Coaching and Books.

D8888	AXSH SATHWARA	17/07/2026 20:58:19	Hello Sir, I have recently graduated and intend to take the SPIPA entrance exam next year. I am currently balancing a part-time job from 10:00 AM to 3:00 PM with my preparation. Given your expertise as a SPIPA faculty member, I would greatly appreciate your guidance on my roadmap. My current strategy is to complete four core GS subjects (Geography, Polity, History, and Economy) by December, begin current affairs in September, and finalize the CSAT syllabus by February. This will provide me with a dedicated revision period prior to the exam in July. I welcome your feedback on this strategy and any potential gaps.\n	Your strategy of completing four GS subjects (Geography, Polity, History, Economy) by December, starting current affairs in September, and finalising CSAT by February looks reasonable, with a gap you should close: you have not mentioned optional subject preparation anywhere in this plan. Optional subject is a significant part of the exam and must run parallel with your GS subjects, not be left out — target completing it by December as well. For SPIPA-specific guidance: For more, watch SPIPA Entrance Exam Booklist Strategy video by SPIPA former Core Faculty Brijesh Patel: https://youtu.be/3agL4E9N-BQ SPIPA paper download: https://spipa.gujarat.gov.in/previous-paper-of-civil-services-entrance-exam Since the SPIPA exam also counts CSAT in the merit list, prepare it well, and add a little general knowledge on Gujarat's History, Geography, and awards from the internet.

The real deciding factor is your subscription duration, not your target year. If your subscription comfortably covers you till 2029, you may choose to wait for a more recent course closer to your attempt and focus on other subjects meanwhile. If your subscription is expiring within a year, it is better to finish this course now — you get free annual updates afterwards via Win27, Win28, and so on.

Complete the Mains economy course (QEP9) first — that gives you grip over one subject's answer writing. Then replicate the same skill and daily-writing habit across your other subjects one at a time, rather than trying to manage all subjects together from day one.

Complete the Mains economy course (QEP9) first to build the skill on one subject, then replicate subject-wise across the rest, picking PYQs only after finishing that specific subtopic.

D8898	Hitendra Kumawat	17/07/2026 21:07:34	Sir, I am a Hindi-medium student; I am not particularly proficient in either Hindi or English. Since I have an engineering background, language proficiency didn't play a major role in my studies. So, Sir, what should I do—prepare in Hindi or in English?\nAnd if I choose English, how can I improve my writing skills? Also, will English grammar play a significant role in this?\nThank you.	If you can manage in English, prepare in English — material is easier to find, process, and remember. Hindi/Gujarati books tend to be unnecessarily contrived and complex, making them harder to read and remember. To improve your English writing for Mains: • NCERT Class 11-12 sociology and political science • NCERT Class 11 India's economic development • Chief editor preface of Yojana and Kurukshetra magazines • Economic survey chapters' introductions and conclusions • Columns in The Hindu / Indian Express • C. Rajagopalachari's translated Mahabharat • (for pronunciation/idioms) Palki Sharma's News at 9PM on Firstpost

				YouTube On grammar: whatever effort you put into improving your English grammar, language, or vocabulary is an investment in yourself for a better rank in this competitive exam — so yes, it matters, and you have the full year ahead to work on it.

Refer to the table at the bottom of mrunal.org/win26 for the update chain (PCB13/14 → Win26 → Win27). Since your book is even older than PCB13/14, make sure you pick up all the intermediate Win## updates in sequence, not just the latest one, so nothing is skipped.

PCB16/QEP9 are explicitly designed to serve the 2027/28/29 target cohorts together — you do not need to wait for a separate future batch just because your target year is 2029. The real deciding factor is your subscription duration, not your target year. If your subscription comfortably covers you till 2029, you may also choose to wait for a more recent course closer to your attempt and use the time to focus on other subjects. Ans. why my teaching speed is fast: is explained in this video https://www.loom.com/share/9b374d30a18f457c8c1ff28007c58171

				In coaching industry, many Teacher teach very Slowly, but they will never complete the syllabus. They will only complete first four chapters and randomly they will end the batch, and tell you to read remaining things from the books. I don't do that. I teach everything from 1st to last chapter. But I need to finish it within the given time limit that is 3.5-to-4 months. It is inevitable that the teaching speed will be fast. If you're facing difficulties – Next morning Read handout If difficulty → open video watch for 5 minutes. Again read. रिकॉर्ड लेक्चर देखिए। पाँच मिनट वीडियो चलाओ , फिर pause करके पाँच मिनिट लिखो या handout से पढ़ो। ऐसे आगे बढ़ो। After few days, you will become adapted the language and flow, and you'll be able to process it much faster. मेरी पढ़ाने की तेज रफ़्तार को मैं कोई मेडल यह उपलब्धि नहीं मानता लेकिन धीरे धीरे चलाएंगे तो यह छह महीने तक चलेगा तो जिनसे भी fees लिए उनके साथ नाइंसाफी है क्योंकि उनको बाक़ी भी विषय पढ़ने होते हैं। " still if want to start from basics 🪜 step1 Read Maharashtra State Board Economy Books ke following chapters Class11: ch. 2,5,6,7,8,9

				Class12: ch. 7,8,9,10 Download Link: https://books.ebalbharati.in/ebook.aspx --- if joining the batch in middle, then plz start from lecture1. In my lectures, the teaching speed increases with the geometric progression (2,4,8,16,32) So better to start from lecture one, otherwise you directly come for lecture 15, then you will struggle to cope up.

It is not as heavy as it looks when you are doing revision, because every chapter has 3-4 pages of index. On the night before the exam, you don't have to read the entire chapter — you only glance through the index, and only open a section if you cannot recall a topic from it. The handout is lengthy partly because PYQs are given at the bottom of each section — but you won't even see those on the night before the exam.

				For economy, the revision flow should be as follows Reading1: morning after the last night class Revision1: before weekly test Revision2: before the mega Test (100 MCQ from all the handouts.) at the end of course Revision3: April-May Revision4: before Prelims- glance over index pages of each chapter. D8928	Priyanka_Tejavath	17/07/2026 22:08:29	Good morning Sir,\n\nI have prepared topic-wise keywords directly from the UPSC syllabus for making current affairs notes. For example: Indian Economy, Inclusive Growth, Government Budgeting, Agriculture, Farm Subsidies & MSP, Public Distribution System & Food Security, Food Processing, Land Reforms, Liberalization & Industrial Policy, Infrastructure, Investment Models, etc.\n\nMy plan is to keep one heading for each keyword and add relevant daily current affairs under that heading throughout the year.\n\nIs this the right approach? Or should I make notes chapter-wise according to your Economy handouts instead? Also, during revision, should I revise only your handouts or both my topic-wise current affairs notes and your handouts?\n\nCould you please suggest the most efficient strategy so that I don't end up duplicating information and can revise effectively before Prelims and Mains?\n\nThank you, Sir.\n	Making separate topic-wise current affairs notes for GS economy is not necessary — bcoz my handout already integrates current affairs within the relevant chapters, and further annual current affairs are covered free every year via the Win## series. So revise only my handouts for economy — do not maintain a separate current affairs note-set for this subject, as it will only duplicate what's already in the handout and cost you extra revision time without added benefit. > How to approach current affairs for UPSC? D8932	Priyanka_Tejavath	17/07/2026 22:26:58	Hello Sir,\n\nI have a doubt regarding current affairs note-making.\n\nShould I stop making Economy current affairs notes (even short notes of 2–3 lines with only important facts) and just read the newspaper while revising your handouts? Or should I stop making current affairs notes for all GS subjects? Or should I continue making notes for other GS subjects and only read Economy current affairs along with your handouts?\n\nCould you please suggest the best approach for effective Prelims and Mains preparation?\n\nThank you, Sir.	For Economy specifically: stop making separate current affairs notes. Just revise my handout, which already integrates relevant current affairs — a separate note-set will only duplicate what's already there. and in future there will be free Win27 series. For other GS subjects: this depends on whether that subject's course/teacher already integrates current affairs into their material the way my economy course does. If not, brief 2-3 line notes for genuinely important facts are fine, but avoid extensive daily note-making across the board — over time this becomes unsustainable and eats into revision time. Prioritise reading over note-making

So, sir I'm very serious about preparation . This year is my first year in graduation and I'm from Nagpur Maharashtra	Yes, you can make running notes during class — this is a new initiative in PCB16 to help you stay engaged and memorise the outline of each topic. Ideally make these with pen and paper, which also builds writing stamina useful later for Mains answer writing. D8964	Rishav	17/07/2026 23:41:33	Sir new student next year first attempt hai aapne bataya class mei 1 year ki current affairs enough nhi hai toh phir 2-3 year ki current affairs karna hoga kya sir ?? By the way u teaching style is fabulous sir 😊😊	Thank you for your kind words. plz go thru my advice at 14m timestamp in the 16th July 2026 PCB16 Orientation class: https://unacademy.com/class/upsc-orientation-strategy-roadmap/WV0Z4U9R Key point: Beginners should not waste time on daily current affairs lectures — focus on theory first. Last one year's exam trend shows current affairs is not very decisive for clearing cutoffs, because majority of MCQs are either pure theory or 2-5 year contemporary issues, not fresh/daily current affairs. Then: • Your first priority should be to complete subjects such as economy, polity, history, geography, environment and science. • All good teachers already incorporate a large amount of current affairs inside their course itself — for example my economy course. • Beyond that, only a fractional amount of current affairs needs separate preparation, and even that is covered free through special classes, e.g. my Win27 series for economy. • Additionally, you can use the monthly current affairs magazine: https://unacademy.com/content/upsc/downloads/ • For completing current affairs of earlier months, for pre-2027 target, read from 1/1/2026 onwards (two calendar years). • No need to make separate notes out of current affairs — most free monthly magazines cover it. Only note down unique information relevant to your

				optional subject, interview, domicile state, Ethics, or Essay. • Keep the habit of reading newspaper columns for at least four months to build vocabulary. • English medium: Indian Express or The Hindu (any one, not both). • Hindi: Jansatta; or The Hindu Book of Editorials for improving further. • How to handle the newspaper effectively: https://youtu.be/boW-QoExVsc?si=lKGnyT2BsZq-AsDG
