Fiscal Deficit related famous committee= Subhomoy Chakravarti Committee (1997-98)

Q. The excess of total expenditure of Govt over its total receipts, excluding borrowings, is (2021-I) (a) Primary deficit (b) Fiscal deficit (c) Current deficit (d) Capital deficit

Gross Fiscal Deficit (GFD) vs NET fiscal Deficit

Gross Fiscal Deficit = Net borrowing at home + Borrowing from RBI + Borrowing from abroad (सकल वित्तीय घाटा)

Net Fiscal Deficit = Gross Fiscal Deficit (GFD) minus the net lending of the central government. (शुद्ध वित्तीय घाटा)

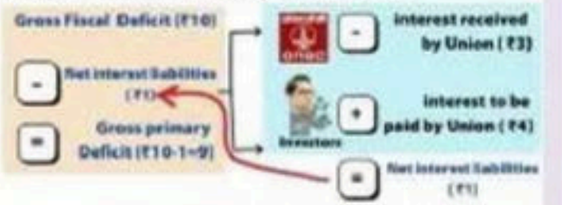
Q: RBI is also 'at home in India' so why show it separately in formula? Ans. NCERT given it so we've to prepare. NCERT didn't bother to explain "WHY" so I didn't bother to PHD.

27.1.9 Primary Deficit (प्राथमिक घाटा)

- PD = Fiscal Deficit minus interest to be paid on previous loans (सरकारों पर जो पैसे पुराने ऋण पर अभी बकाया है उसे कम करेंगे।)
- 1995: Finance Minister Manmohan Singh's budget speech mentioned it.
- If the govt continues to borrow year after year, it leads to accumulation of debt and the has to pay more and more interest. These interest payments themselves add more burd borrow more year. (पुराने लोन पर जो ब्याज चुकाना है उस ब्याज को पाने की स्थिति में नहीं गिना जाएगा)
- So, to get a clearer picture of how much is the government borrowing for new progra they look at another indicator. (यानि कर्ज की 3 विधाओं के ब्याज के लिए अलग-अलग गणना प्राथमिक घाटा पता चलता)

27.1.10 Gross Primary Deficit (GPD) सकल प्राथमिक घाटा)

Gross primary deficit = Gross fiscal deficit MINUS Net interest liabilities



FAQ : 1) Formula for net primary deficit? Ans. Similar to above, i.e. = Net Fiscal Deficit minus net interest liabilities = Net Primary Deficit.

FAQ : 2) difference between Primary Deficit vs Gross Primary Deficit. Ans. Read Yadh disclaimer on deficit formulas.

FAQ : 3) Shouldn't "X" thing have Plus sign or Minus sign? Ans. Accept & memorize.

27.2 (घाटे) REVENUE DEFICIT (राजस्व घाटा)

- When govt spends more than its income in revenue account, it incurs ...
- Revenue deficit = Revenue expenditure − Revenue receipts. (जब सरकार आमदनी कम
- Since most of revenue expenditure is 'committed' (like interest repayment on previous loa staff-salaries & pensions which Govt can't 'avoid'), so difficult to ↓ the revenue deficit.
- So, when revenue deficit ↑, govt forced to borrow more money or ↓ ↓ expenditure in c capital part (= less new schools, bridges and hospitals) → ↓ ↓ human dev, and lower economic growth (less new bridges → ↓ demand of steel/cements → ↓ growth in the sectors).

42. In a multi-ethnic district where both economic competition and historical grievances frequently led to community tensions, a flashpoint has arisen with a Government decision to allocate land for a waste management facility near a tribal hamlet, sparking protests by the tribal community, which claimed that the land was sacred and critical to their cultural identity. At the same time, urban residents and local industries supported the project, citing severe solid waste challenges and health concerns due to lack of a proper disposal site. The conflict has escalated with road blockades, social media campaigns, and allegations of police excesses. As a responsible Government official, you are tasked with resolving the situation through mediation, ensuring a sustainable outcome that balances environmental needs, tribal rights, and urban public health.

Consider the following statements with reference to the above:

1. A successful conflict resolution process must begin with acknowledging the cultural concerns of the protesting tribal community before discussing technical alternatives.
2. The Government should move ahead with the project without delay to address urban health concerns, which outweigh the sentiments of a small group.
3. Creating a multi-stakeholder dialogue platform including tribal leaders, environmental experts, and municipal representatives - to build mutual understanding and help de-escalate tensions.
4. Conducting an independent Environmental and Social Impact Assessment (ESIA) and sharing findings transparently with both sides to facilitate evidence-based decision-making.

Which of the statements given above would contribute to the resolution process?

In July-September, for

As such, Nageswaran said, the GDP data wasn't really overstating growth. "But unfortunately, all these under-informed or half-baked questions are left deliberately hanging so as to sow the seeds of doubt in people and it doesn't necessarily serve any purpose because they are not rigorous."

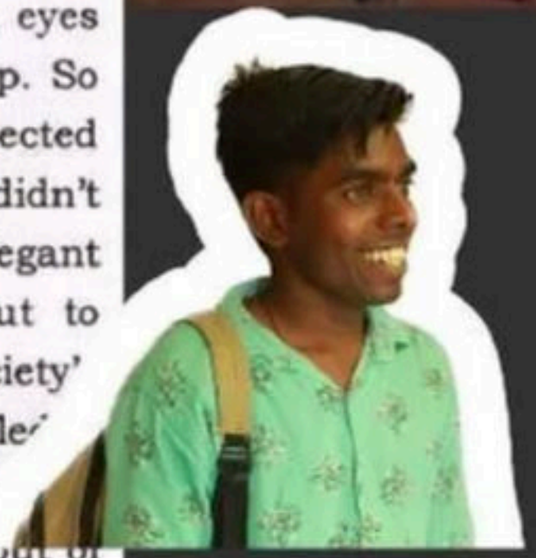
Was it the sun-dappled ambience, the strawberries and cream, the frustration of Flavio Cobolli's unforced errors against Serbian Novak Djokovic on Centre Court or simply the crushing weight of being a 64-year-old man in the third act of a very public life? Whatever the reason, Hugh Grant, the actor, deserves empathy. There he was, in the Royal Box at Wimbledon, flanked by Britain's well-dressed and well-rested spectators, watching the men's singles quarterfinals, when the actor did something quietly radical : head at a tilt, eyes closed, utterly unbothered, he took a nap. So praise be to Grant for serving up an unexpected ace. In that small, delicious moment, he didn't merely catch forty winks, he made an elegant case for surrender. Not to laziness, but to limits. To the body's quiet wisdom over society' relentless performance metrics. Wimble had its tennis. The perpetually sleep-de discovered a leading man, not of action, but of rest.



62. Which of the following statements is/are correct?

1. Hugh Grant was watching, from the Royal Box, the men's semifinal match on Centre Court between Flavio Cobolli and Novak Djokovic.
2. The phrase 'unexpected ace' in the context uses a term from the game of tennis to highlight Hugh Grant's somewhat uncharacteristic act of catching 'forty winks'; an act that is viewed with opprobrium.
3. Grant subjects the demands of society to the wisdom of his body.

"Reddin model of leadership added third dimension to the existing two basic dimensions of leadership identified by Ohio Studies and Blake and Mouton."

Reddin's 3-D Management Style Theory

William J Reddin (1970) was the first to add the dimension of "effectiveness" to the task concern and relationship concern dimensions of earlier attitudinal models such as the Managerial Grid and called it as 3-D Management Style Theory. The third dimension effectiveness was added to the two—dimensional model in recognition of the fact that the effectiveness of leaders depended on how their leadership style interrelated with the situation in which they operated. When the style of a leader is appropriate to a given situation it is termed effective, when the style is inappropriate to a given situation.it is termed ineffective. But the basic styles may it be effective or ineffective, depends on the situation. The difference between the effective and ineffective style was often not the actual behaviour of the leader, but the appropriateness of this leader behaviour to the environment in which it was used was of great significance. Thus the third dimension was the environment called "effectiveness" because in most organisational settings various performance criteria were used to measure the degree of effectiveness or ineffectiveness of a manager or leader.

The 3-D Theory of Reddin offered two main elements in managerial behaviour –concerned with the task to be done and relationship with other people that could be used in small or large amounts. In this effort, four basic styles could be arranged on two dimensions in four quadrants namely, Devoted, Integrated, Related and Separated styles. Any of these four basic styles of behaviour could
