10.2.1 Types User-Accounts & Facilities at Unacademy

Fees-range subject to change	Mrunal's Mains Economy (QEP) included in following courses	✍️ Mains Ans Evaluation?
~ ₹ 2000	GS Mains Paper-3 **only**	N/A
~ ₹ 8000	MRTS : GS Mains ke 4 papers, Essay	✅ Yes
~ ₹ 17–23k	Plus subscription for 1 year (Prelims & Mains ke courses, PDF, MCQ Tests)	N/A
~ ₹ 30k onwards	Iconic subscription = Plus ki facility & mentorship, printed book etc.	✅ Yes

- We pay a decent amount per copy to the evaluators, to ensure students get personalized high-quality feedback on every answer.
- Therefore, the facility is now restricted to some accounts to ensure unit economics profitability and sustainability.

10.3 PROLOGUE – WRITE LESS BAD THAN OTHERS. दूसरो से कम ख़राब लिखना है

⇒ UPSC has never uploaded the evaluated copy of the Toppers, Never gave exact methodology of marking / evaluation system.

⇒ So in answer writing, what tricks work and what does not work? = Nobody knows for sure.

⇒ Just like classical music, there are different "gharana" in coaching industry. I belong to the Ahmedabad "gharana". Whatever few things I suggest about mains answer writing or interview- is what I picked up from professors, retired bureaucrats and toppers based in Gujarat, who had some direct/indirect dealings with UPSC.

⇒ So, my advisory may not always match with what is suggested/taught by "Delhi Gharana"- who have developed their set of singing-principles from other set of professors/bureaucrats/toppers.

⇒ And, neither Gharana is completely right, because neither has 100% insider knowledge of what exactly is appreciated or penalised by the present group of Mains evaluators. Also, there is no guarantee that your paper will go to which evaluator!

⇒ If you have faith in the doctor, then the medicine work, otherwise it will not work. And this doctor is not pointing gun at your head to take his medicine.

This handout is divided into following parts

1. INTRODUCTION TO THE ANSWER
2. BODY ARGUMENTS IN THE ANSWER
3. CONCLUSION METHODS
4. Appendix: Grammar, FAQ etc.

11 INTRODUCTIONS OF THE ANSWER

Question	How important is intro & conclusion?
Essay	5 Star
250 words	3 Star
150 words	Depends whether you have powerful points in the body or not? And whether you have enough word limit left after writing those powerful body points?

"I have a dream that one day this nation will rise up and live out the true meaning ….. that all men are created equal.'" - Martin Luther King Jr. (1963)

If the same speech introduction was written by BabuShona Mains Aspirant then

> recently Martin luther king jr. gave a Speech about equality.

1. "Recently" kab hua bhai?? He gave it in 1963.
2. so many grammar rules violated about capital letter and small letter.
3. Expression 'delivered a speech' is better than 'gave a speech', because he was addressing a very large audience at a formal event.

11.1 INTRODUCTION NEED TO GIVE CURIOSITY ABT THE PLOT

Stephen King's novel Dark Tower (1982) → chapter#1 sentence#1 →

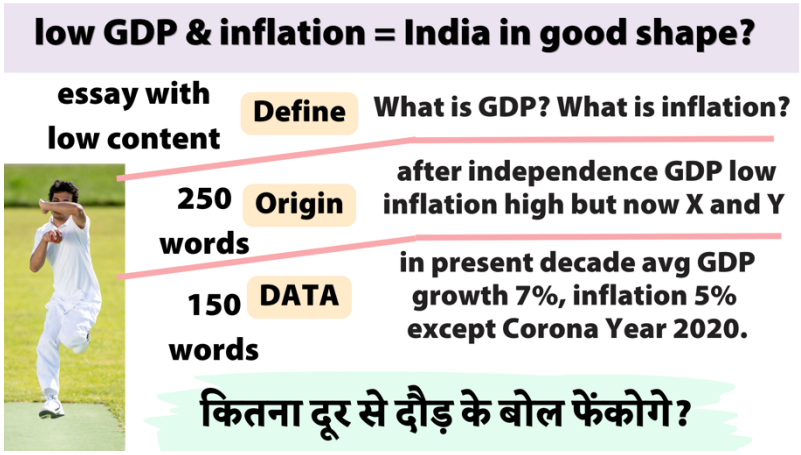

> **The man in black fled across the desert, and the gunslinger followed.**

11.2 INTRODUCTION: WHAT TO USE WHEN?

⇒ There are 5 major ways to start an intro such as - Define/origin/data/quotation/case study

⇒ Quotation/case study = maybe used in essay writing. Not generally advisable for GSM. Because you will not get enough time or word limit to brainstorm the relevant quote/case study for 20 Qs.

⇒ **PYQ GSM3–2019:** Do you agree with the view that steady GDP growth and low inflation have left the Indian economy in good shape? Give reasons in support of your arguments. (क्या आप सहमत हैं कि स्थिर जीडीपी वृद्धि और कम मुद्रास्फीति ने भारतीय अर्थव्यवस्था को अच्छी स्थिति में छोड़ दिया है?)

⇒ There are three ways to begin this answer

INTRO	DESCRIPTION

Define	Gross Domestic Product (GDP) is the market value of all goods and services produced within a country borders in a given period of time, typically a year. Inflation is a sustained increase in the general price level of goods and services in an economy over a period of time. It is often measured as the percentage change in the Consumer Price Index (CPI).
Origin	After Independence, our GDP growth rate remained muted and inflation sometimes crossed double digit numbers due to wars and droughts. However, in the recent years, this has stabilized.
Data	In the present decade, India's average GDP growth rate has been around 7% and average inflation around 5% barring Corona year 2020.

So how many of the above introductions should I use for the answer?

How many arguments do you have for the body?	**Define**	**Origin**	**Data**
I've large no. of arguments to write in body	xx	xx	Yes start from here
medium	xx	Yes write it	Yes write it
small/negligible body points	Yes	Yes	Yes

11.3 INTRODUCTION : DEFINE + DATA

PYQ: While we found India's demographic dividend, we ignore the dropping rates of employability. What are we missing while doing so? Where will the jobs that India desperately needs come from? Explain. (हमें भारत में जनसांख्यिक लाभांश तो मिल गया लेकिन उन युवाओं के रोजगार योग्यता की गिर रही है उसे हम नज़रअंदाज़ करते हैं। हम से क्या चूक हो रही है? भारत जो अपरिहार्य रूप से चाहिए वो नौकरियां कहां से आएँगी?)

Intro	Description
Define	Demographic dividend refers to the economic growth potential that can result from changes in a country's age structure, particularly when the proportion of working-age individuals (ages 15–64) in the population is larger than the proportion of dependents (ages 0–14 and 65+).
Origin	not suitable.
Data	According to the Census of India 2011 over 65% of the population was aged less than 35. However, as per the Periodic labour force survey (PLFS) unemployment rate in India is around 12% for age 15–29. That means 1 out of every 8 young persons is looking for job, but not finding one.

11.4 INTRODUCTION : DATA CENTRIC

PYQ: Normally countries shift from agriculture to industry and then later to services, but India shifted directly from agriculture to services. What are the reasons for the huge growth of services vis-a-vis industry in the country? Can India become a developed country without a strong industrial base? (सामान्यतः देश कृषि से उद्योग और फिर बाद में सेवाओं की ओर जाते हैं, लेकिन भारत सीधे कृषि से सेवाओं की ओर गया? क्या भारत एक मजबूत औद्योगिक आधार के बिना विकसित देश बन सकता है?)

INTRO	**DESCRIPTION**
Define	Not relevant to define the terms agriculture, manufacturing or

INTRO	DESCRIPTION
	service sector. Because these are very basic terms. There is no display of your intellectual depth in writing their definition.
Origin (weak bcoz context/tone of this question require talking from Independence.)	Since the LPG reforms in 1991, the service sector has emerged as the major contributor to India's Gross Domestic Product (GDP), while share of agriculture in the GDP of India has fallen significantly.
Data (Better to start from here)	Immediately after independence, in the 1950s, agriculture contributed over 50% of India's GDP. However it has shrunk to less than 20% in recent years, meanwhile, service sector has become the major contributor to India's GDP.

11.5 👑 HISTORY- SAMPLE INTRODUCTIONS FROM GSM1–2025

Q. Discuss the salient features of the Harappan architecture.

- (Origin)"The Harappan Civilisation" is also known as the Indus Valley Civilisation. The total time span of the civilisation ranges from 6000 BCE to 1300 BCE.

Q. Examine the main aspects of Akbar's religious syncretism.

- (Origin) Akbar was the third ruler of Mughal empire. He reigned in the 16th century (from 1556–1605, if u can remember it.)
- 1570s: While Akbar was at Fatehpur Sikri - he started discussions on religion with the ulama, Brahmanas, Jesuit priests who were Roman Catholics, and Zoroastrians.
- These discussions took place in the ibadat khana led Akbar to the idea of sulh-i kul or "universal peace" & Din-i-Ilahi or "Religion of God".

Q. The sculptors filled the Chandella art form with resilient vigor and breadth of life'. Elucidate.

- (Origin) In medieval India, the Chandella kings ruled over Madhya Pradesh and parts of Central India. They are renowned for constructing the Khajuraho temples.

Q.Trace India's consolidation process during early phase of independence in terms of polity, economy, education and international relations.

- (Origin) On 15th Aug, 1947, India became free of British rule, but not free of problems—Partition, Cold War, riots, famine, poverty.

Q. The ethos of civil service in India stand for the combination of professionalism with nationalistic consciousness-Elucidate

- (Origin) British had setup ICS (Indian Civil Service) & IP (Indian Police) as a steel frame to rule over India.
- After India's independence, Home Minister Sardar Patel renamed and continued them as IAS & IPS to ensure unity and stability in administration.

Q. The French Revolution has enduring relevance to the contemporary world Explain.

- (Origin) In 18th Century (1789 if u can remember), the people of France (also called Third Estate) rose against the absolute monarchy of King Louis XVI. They overthrew the old regime through the French Revolution, demanding Liberty, Equality, and Fraternity. These demands are still relevant in the contemporary world in the following ways (body…)

11.6 Society- Sample Introductions from GSM1–2025

Q. Two axes of Tribal development in India - displacement and of rehabilitation?

- (Origin) schedule Tribes are the communities who live, in close association with forests.
- (Data) ~9% of Indian population consist of schedule tribes as per census-2011.

Q. How do you account for the growing fast food industries given that there are increased health concerns in modern society? Illustrate your answer with the Indian experience.

- (Definition:) Fast food is a type of street food that is prepared quickly and eaten immediately. It is typically high in oil, fat, and salt.
- (Origin) Even before India's independence, we had street food such as samosas and panipuri. However, post-LPG reforms of 1991 marked the entry of fast food chains like McDonald's, KFC, Domino's Pizza.
- Their marketing tactics along with rising nuclear family and working couples have led to an increase in fast food consumption in India.

Q. Globalization has increased urban migration by skilled, young, unmarried women from various classes. How has this trend impacted upon their personal freedom and relationship with family?

- We can start with the definition of globalisation, but it is implied that Prof. knows about it. Better we go for its origin.
- (Origin) The 1991 LPG reforms have opened up tremendous opportunities in the IT/service sector jobs for educated youth.
- This has improved the labour force participation rate (LFPR) of females to 41% as per the Economic Survey 2025–26.
- But most of these service sector jobs are located in big cities, requiring women to migrate from their hometowns and villages.

11.7 Geography- Sample Introductions from GSM1–2025

11.7.1 Geo1- Global warming and sea level rise.

Q. How are climate change and the sea level rise affecting the very existence of many island nations? Discuss with examples.

- (Definition:) Climate change means the long-term rise in Earth's temperature due to excess CO_2 and other greenhouse gases in the atmosphere.
- (Origin) Since the Industrial Revolution, large-scale burning of coal and oil has pushed global temperatures higher than ever before, resulting in the problem of global warming.
- (Data) > in real exam, not possible to memorise this data.

11.7.2 Geo2— Sustainable Growth vs Poor People's Needs

Q. Achieving sustainable growth with emphasis on environmental protection could come into conflict with poor people's needs in a country like India - Comment

- (Definition:) As per the Brundtland Commission (1987), sustainable development means meeting the needs of the present without compromising the ability of future generations to meet their own needs.
- (Origin) India is home to 140+ crore people, of whom ~16% still suffer from multidimensional poverty as per the UNDP Report (2025)

Reflection: I could have written that as per Tendulkar method, the poverty has dropped to just 2.3% in 2023! But then it makes the whole answer redundant if there are so few poor people, then there should not be any problem with sustainable development!

11.7.3 🌐Geo3 — Non-Farm Primary Activities

Q. What are non-farm primary activities? How are these activities related to physiographic features in India? Discuss with suitable examples.

- (Definition:) - Economic activities are broadly divided into three categories: primary (extracting from nature), secondary (manufacturing & utility), and tertiary (services).
- Non-farm primary activities include fishing, mining, forestry, and animal husbandry.
- padding with examples was necessary, because in the body part student may not have that much to write about.
- (Origin & data) As India gradually moved from an agrarian economy to a modern economy the share of primary activities has declined in GDP But it continues to remain the largest employer across the Sectors. In India's economy (2025–26), the primary sector contributes ~20% of GVA, secondary ~26%, and tertiary ~54% — yet the primary sector still employs the largest share of India's workforce.

Reflection: In economy, not possible to memorise every data, but you are supposed to memorise this both for prelims and mains because it is the latest GDP data after the base year reforms in 2026.

11.7.4 🌐Geo4- Tsunamis

Q. What are Tsunamis? How and where are they formed? What are their consequences? Explain with examples.

- (Definition:) A tsunami is a series of powerful ocean waves triggered by sudden underwater earthquakes.
- (Origin) The 2004 Indian Ocean tsunami, triggered by a massive undersea earthquake near Sumatra, killed over lakhs people across South Asian countries including India, Thailand, and Sri Lanka.
- (Data) not possible to memorise, exactly how much richter scale was the earthquake or how many lakhs of people were killed.

11.7.5 🌐Geo5- Plate Tectonics

Q. Discuss how the changes in shape and sizes of continents and ocean basins of the planet take place due to tectonic movements of the crustal masses

- (Origin) Plate tectonics is the theory that Earth's outer shell is divided into large rocky slabs called tectonic plates, which slowly move over the molten mantle beneath — and it is this continuous movement over millions of years that has shaped and reshaped the continents and ocean basins we see today.
- (Data) The seven continents in decreasing order of size: Asia > Africa > North America > South America > Antarctica > Europe > Australia.

11.7.6 🌐Geo6- Ganga Basin's population density

Q. Discuss the distribution and density of population in the Ganga River Basin with special reference to land, soil and water resources.

- (Definition:) Population density refers to the no. of people living per square km of land area
- This indicator helps to understand why certain regions attract more humans than others.

- (Origin) India's mainland comprises four broad regions (i) great mountain zone, (ii) the Ganga-Indus plains, (iii) desert region, (iv) southern peninsula
- (Data) Among these, the Ganga river basin recorded the highest population growth of ~25% between the 2001 and 2011 Census. (given in NCERT)

11.7.7 🌐Geo7. Solar Energy

Q. Explain briefly the ecological and economic benefits of solar energy generation in India with suitable examples.

- (Definition:) Renewable energy comes from natural sources like sun, wind, and water that never run out — unlike coal or oil.
- (Origin) Burning coal and oil releases CO_2 and other greenhouse gases (GHGs) which causes climate change — so the we need to shift to cleaner energy sources like solar.
- (Data) As of 2025, non-fossil sources make up 51% of India's electricity capacity, with solar alone at 25%.

11.7.8 🌐Geo8- Offshore Oil

Give a geographical explanation of the distribution of off-shore oil reserves of the world. How are they different from the on-shore occurrences of oil reserves.

- (Definition:) Offshore oil reserves are oil deposits found under the sea floor — examples include Gulf of Mexico, North Sea, and India's Mumbai High.
- (Origin) Millions of years ago, dead sea plants and animals sank to the ocean floor. Over time, heat and pressure converted them into oil and gas.
- When tectonic plates shifted, some of these deposits got trapped under the seabed — forming offshore oil reserves.

11.7.9 🌐Geo9. AI & GIS in Planning

Q. How can Artificial Intelligence (AI) and drones be effectively used along with GIS and RS techniques in locational and areal planning?

- (Definition:) Artificial intelligence are computation systems that can think, learn, and solve problems like humans do.
- (Origin) 2022: AI became a household name after ChatGPT was launched. and since then use of AI has spread rapidly across sectors worldwide.

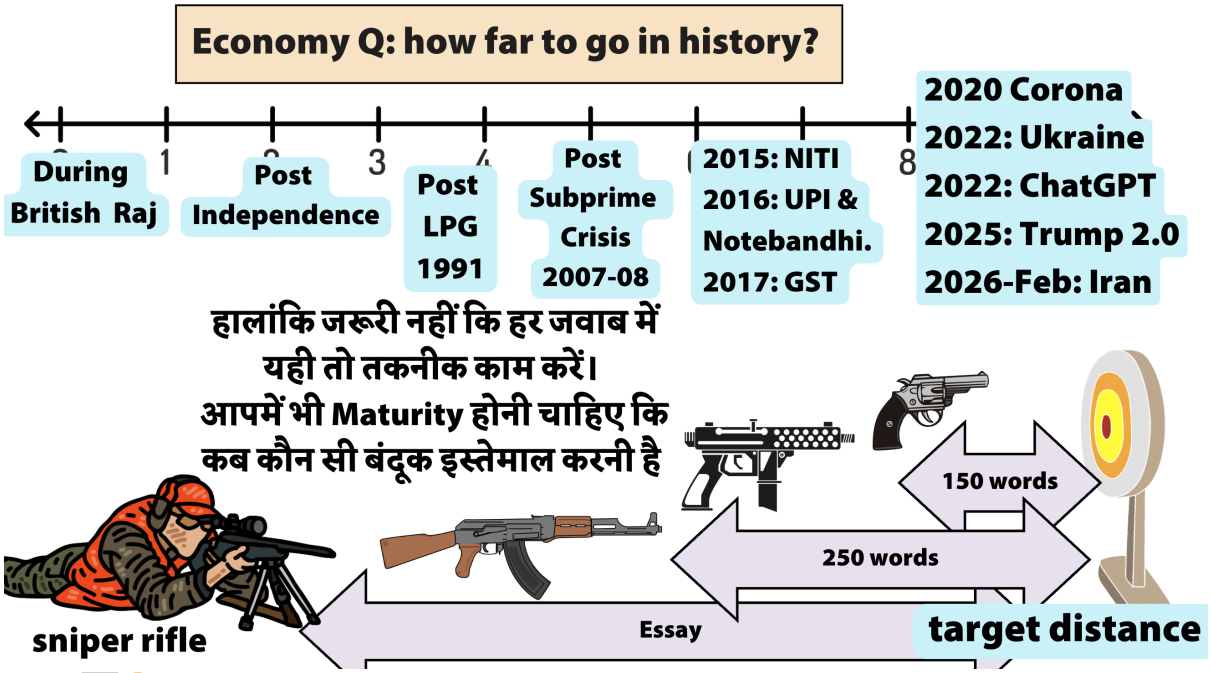

11.8 🌅Intro: Economy Origin - how far in history should we go?

- When writing the origin of a topic, careful how much far back in the history you have to go?
- in the above Agriculture to service sector shift, we started talking from Independence onwards. But same strategy not suitable in every question

PYQ	Intro origin
Foreign direct investment in the defence sector is now said to be liberalised. Discuss its impact in short and long run?	better to start from 1991 LPG and not from independence.
The increase in life expectancy in the country has led to newer health challenges in the	here, you can start even from the time of British, when the life expectancy was very low, and we had a 'great divide' in 1921 when population growth was negative because of

PYQ	Intro origin
community. Discuss	excessive death after WW1, Spanish flu influenza and famine.

Note: for more examples of intros from PYQ-2023: refer to this handout's Part-D's end section.

11.9 INTRODUCTION: IMPACT CHANGES WITH ERA

Introduction should not give so much insight into a ridiculous plot that the reader may feel irritated to read further. Consider: Novel Pride and Prejudice by Jane Austen (1813) → first sentence of the first chapter:

> "It is a truth universally acknowledged, that a single man in possession of a good fortune, must be in want of a wife."

⇒ Plot hint: love triangles / in-laws desperate to get daughters married to rich men, Conclusion/Climax will have a happy marriage. 1800s ki audience enjoyed it.

⇒ But, modern day social media users may deride this intro for variety of angles related to feminism/patriarchy/wealth/capitalism.

⇒ so it may have been a good intro in 1813, but no longer good intro for 2024. Similarly,

OLDER NOTIONS	PRESENT SCENE
Fiscal deficit is a very bad thing.	Post-corona countercyclical policies justify/need the fiscal deficit / government borrowing.
Nonalignment was cornerstone of India's foreign policy. We kept the	We align with variety of groupings depending on our economic, strategic and environmental objectives be it

distance from American and European powers.	I2U2 or QUAD etc.
Wind power was considered to be a panacea / one stop solution for pollution control & energy security.	India wind turbine company Suzlon ke debt/financial problems, threat to bird population, 15% slowdown in windspeed in EU (2021) combined with Russia-Ukraine war = Energy crisis in Europe.

So, think about the tone of the question and how you are introducing it, and whether it will irritate the evaluator to a point that he does not even care to read the body.

12 👩‍🎨PART-B: BODY ARGUMENTS

12.1 👩‍🎨BODY: COLUMNS TO GATHER POWERFUL /REFINED ARGUMENTS

12.1.1 Example: Constitutional morality enforced by SC.

⇒ This was asked in GSM2–2012, buy Most of the Coaching material give generic bol-bachchan material, while One IndianExpress column had specific article

⇒ How Supreme Court judgements on decriminalisation of adultery and decriminalisation of homosexuality, passive euthanasia etc. differ from the religious molarity.

⇒ Because Supreme Court looks at the issue from the point of **constitutional morality,** right to privacy, right to choose sexual partners etc.

⇒ Whereas the **religious morality** looks at these issues from different perspectives.

⇒ 2025-26: You can add angles of **10th Schedule / Anti-defection law's absurdity** in it with respect to how splits/mergers of Shiva-Sena, TMC, AAP (Raghav Chaddha) etc happened, and how it goes against the **constitutional morality of 10th Schedule**.

12.1.2 👩‍🎨Refined Arguments: E-court/E-Hearing

E-Court	Coaching Material	Columns giving refined arguments
+ve	Generic Bol Bachchan about speedy hearing and reduced travel cost	The witness/victim is not as nervous or embarrassed at home as they are in a real court. Therefore, they are able to give their testimony more accurately.
+ve	Generic Bol Bachchan	⇒ 1) Judge cannot read the body language of the

E-Court	Coaching Material	Columns giving refined arguments
	about Digital divide and internet connectivity	accused person in zoom online meet. So it becomes difficult for the judge to identify remorse / guilt. ⇒ 2) Judge relies more on the PDF affidavits rather than the verbal arguments of lawyer due to frequent audio/video freeze.

12.1.3 👩‍🎨 Refined Arguments: Water crisis in India.

Most of the Coaching material give generic bol-bachchan material around rice, sugarcane, ground water depletion, watershed, river interlinking, micro-irrigation etc. But upon reading the newspaper columns, you get the higher-quality arguments such as

⇒ While micro irrigation can help conserving water but most farmers do not adopt it due to trampling by the wild animals, no compensation under insurance scheme, repair cost, unavailability of the repairman etc.

While **direct seeding of rice (DSR)** can help conserving water but most farmers do not adopt bcoz

⇒ 1) Govt provides **subsidised/free electricity** & irrigation water so there is no motivation or incentive to save water.

⇒ 2) DSR requires **purchasing special equipment** / use of more labourers but govt enough giving enough subsidy for it.

12.1.4 👩‍🎨 Refined Arguments: Minimal Government

Most of the Coaching material give generic bol-bachchan material but nothing that is substantial or easy to remember/understand. Then problem starts when you have to write it for 250 words / essay.

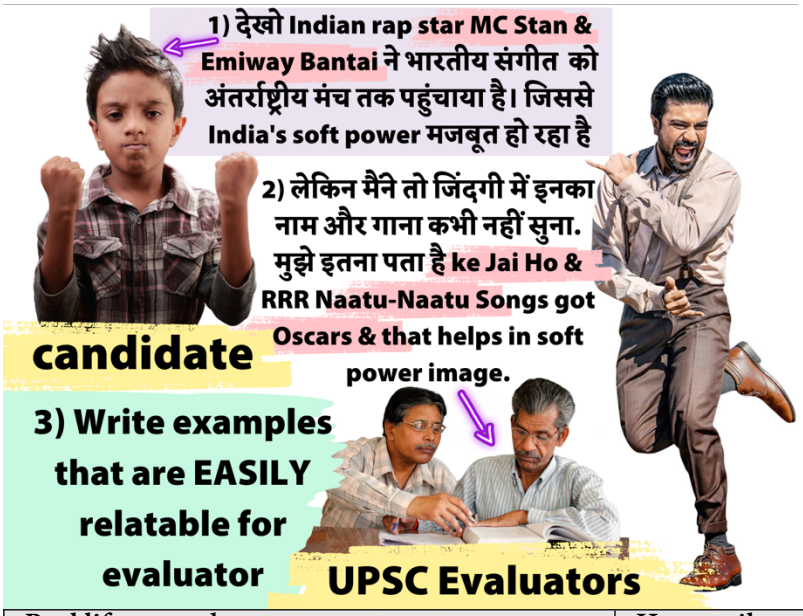

⇒ Sometimes, the role of govt is to create demand and then private sector automatically will jump in to supply it. e.g.

⇒ UDAN Scheme to subsidise the airfare in smaller cities. Middle class will start using more air services → Number of air flights, airports hotels will increase. Government does not have to run Air India by itself to improve the availability of air transport.

⇒ Bollywood Mega-Actor Amitabh Bachchan starring "Khushbhu Gujarat ki" advertisement campaign by Govt of Gujarat: Number of tourists will increase → Entrepreneur will build more hotels & jobs for youth. Govt itself does not have to run hotels and guest houses or recruit tour-guides/taxi-drivers.

12.2 👩‍🎨 Body examples need to be relatable to the professor

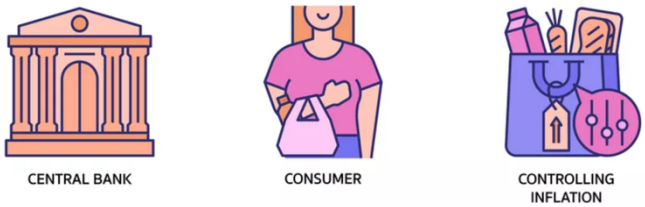

Suppose in GSM2 / GSM4, we have to elaborate something about the role of IAS in urban planning / urban administration / improving the ease of living for city dwellers.

Real life example	How easily can evaluator connect with this?
Ahmedabad Traffic congestion and Corona control by IAS Vijay Nehra.	cannot easily visualise/connect. Prof. may think that the Corona / traffic control in some other city was better.
Rebuilding of Bhuj (Kutch) after 2001's Earthquake	yes, can connect because cited many times
Plague control in Surat by IAS SR Rao (1994)	Yes, but very old example. Need to connect with something fresh.
Transformation of Surat from a rat and plague-infested city of the 1990s to the cleanest city rank#1 the Swachh Bharat survey of 2023.	Yes, even if he has not visited the city personally, he can visually connect, because of the powerful argument and fresh official data.

It is among the reasons why I prefer Indian express over the Hindu. theHindu gives examples of Delhi, but Delhi is not a full state, so you do not get variety of cases to think and reflect about the role of IAS/IPS (e.g. from Ahmedabad, Bhuj, Surat districts).

12.2.1 👩‍🎨Body: Example cases for hyperinflation

⇒ (2023): In Argentina, inflation has crossed over 100% so residents rush to spend pesos in fine restaurants, before they lose more value.

⇒ The above are correct news item, but not necessary that EVERY evaluator must be aware about this- because it has not grabbed headlines of each and every printed newspaper.

⇒ To play it safe, you should write about hyperinflation cases that have been famous for a long time, such as Germany after the Treaty of Versailles, Zimbabwe, or Venezuela.

12.3 👩‍🎨BODY EXAMPLES: REFLECT ON THE SAME FAMOUS NEWS HEADLINE TIMES

> You can write good body, If only you have a good arguments/points, which is possible if only you've done extensive reading/reflection.

12.3.1 👩‍🎨Case: adulterated medicines

66 Gambian children died after consuming cough syrup exported by an Indian company. Reports of death and blindness in Sri Lanka after using Indian medicines. (2023)

⇒ **GSM2**: good governance / ease of doing business requires that civil servant should become facilitator rather than regulator/inspector. Govt has allowed self-certification for pollution control, labour laws/EPFO compliance in many sectors. But care should be take not compromise with the safety and security esp. in pharmaceuticals in the name of 'ease of doing business'.

⇒ **GSM2**: India has improved its soft power image/soft diplomacy through two initiatives: 1) Corona Vaccine Maitri and 2) providing the source code for the COWIN App. However, recent incidents involving deaths caused by adulterated Indian medicines in foreign countries may dent this image.

⇒ **GSM3**: The economic survey suggests that India can become the pharmacy of the world, boosting its export earnings and job creation. However, this is subject to addressing the following challenges: 1) suboptimal private investment in R&D, 2) patent evergreening, and 3) spurious/adulterated medicines.

⇒ **GSM4**: The materialism, greed, and corruption have increased so much that some businessmen even endanger the lives of people by selling adulterated food and medicine.

Vocab: Adultery (व्यभिचार/बेवफ़ाई), Adulteration (मिलावटखोरी), Adulation (प्रसंशा) mean different things.

12.3.2 👩‍🎨Case: Tata-AirIndia buying 500 Aircrafts

Tata-AirIndia and Indigo have placed orders to purchase total nearly 1000 aeroplanes from USA/EU. American and European politicians have thanked and appreciated these Indian companies for creating jobs in factories of USA/EU. (2023)

⇒ **GSM1- Decolonisation**: History has come full circle. European powers impoverished India through colonization. Even after independence, Western powers continued to humiliate India with food aid and sanctions after nuclear tests. Today, these Western economies are gripped with the problems of slowdown and unemployment, and it is Indian companies that are creating jobs for them.

⇒ **GSM2- Government policies for various sectors**: The Udaan scheme has greatly improved aviation demand in small cities, so much so that Indian airline companies have had to purchase many new aircraft.

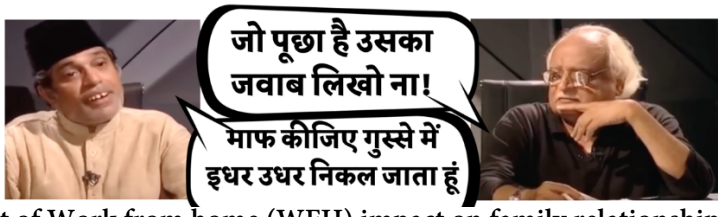

⇒ **GSM2- Polity-Regulatory bodies:** The Indian economy is moving towards a duopoly structure, be it Air India and Indigo in the aviation sector, Jio and Airtel in the telecom sector, or Amazon and Flipkart in e-commerce. All of this calls for more oversight by the Competition Commission of India (CCI).

⇒ **GSM3- Budgeting:** Govt strategic disinvestment/privatisation of Air India was a step in the right direction. This loss-making/debt-ridden Air India is now regrowing its business by placing orders for 500 odd new aircrafts. Only a visionary entrepreneur like Ratan Tata can think in this direction. A minister or IAS officer (heading govt-owned Air India) can't do it because of

bureaucratic hurdles and financial constraints. The same also happened after the privatisation of Maruti-Suzuki in the early 2000s.

⇒ **GSM3- Economic Planning / Science technology:** Problems of brain drain / IPR innovation / R&D / lack of shipbuilding and aircraft building industry in India to meet local demand. Import aircraft or naval ships causes huge current account deficit (CAD).

12.4 👩‍🎨 BODY: ANSWER WHAT IS ASKED. जो पूछा उसका जवाब लिखो।

PYQ: Discuss impact of Work from home (WFH) impact on family relationship.

⇒ Work from home is not suitable for manufacturing industry where worker has to remain present in the factory. = bhai he has NOT asked ke in which industries WFH is suitable OR not suitable. He is asking about impact on family relationship.

⇒ Impact on productivity/stress is also not asked.

⇒ You have to link productivity/stress with the family relationship.

PYQ: "The growth of cities as I.T. hubs has opened up new avenues employment but has also created new problems. Discuss.

- Socio economic environment problems. And additionally,
- impact on nocturnal animals with constant noise and light pollution, golf course chemical gardening's negative impact on insects sparrow foodchain.

PYQ: "For achieving the desired objectives, it is necessary to ensure that the regulatory institutions remain independent and autonomous." Discuss.

- Most candidates' will play pipudi just around the human rights, election commission. Forgetting about the financial sector regulators. (Urjit Patel resignation)
- "Election regulator" does not refer only to the national election commission, but also includes state election commissions (SECs). For example, the Supreme Court rejected the Bengal SEC's petition against the deployment of central troops for peacekeeping during local elections, with harsh remarks: "**The conduct of polls cannot be a license to violence.**" (2023).

PYQ: Most of the unemployment in India is structural in nature. Examine the methodology adopted to compute unemployment in the country and suggest improvements. (भारत में सबसे ज्यादा बेरोजगारी प्रकृति में संरचनात्मक है। भारत में बेरोजगारी की गणना के लिए अपनाई गई पद्धति का परीक्षण कीजिए और सुधार के सुझाव दीजिए) (2023)

- **NOT asked:** Why is there structural unemployment?
- **NOT asked:** How to reduce unemployment?
- **YES asked:** How to fix the methodology to calculate on employment?

12.5 👩‍🎨Body Arguments: Everything is not spoon-fed.

everything can't be spoonfed. hv 2 think on ur feet.

PYQ-2022-GSM3: **Economic growth in the recent past has been led by increase in labour productivity. Explain this statement. Suggest the growth pattern that will lead to creation of more jobs without compromising labour productivity. ("हाल के दिनों का आर्थिक विकास श्रम उत्पादकता में वृद्धि के कारण संभव हुआ है।" इस कथन को समझाइए । ऐसे संवृद्धि प्रतिरूप को प्रस्तावित कीजिए जो श्रम उत्पादकता से समझौता किए बिना अधिक रोजगार उत्पत्ति में सहायक हो)**

Above answer not directly given in Books/Notes. What thought process does this require?

Ans. Explained in the lecture video.

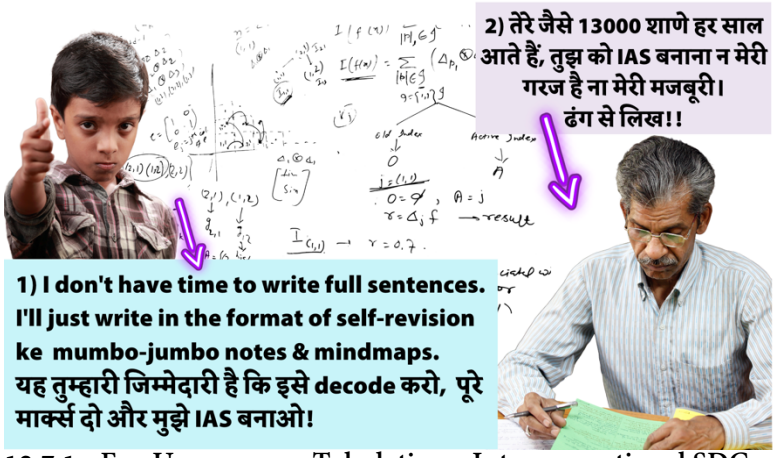

12.6 👩‍🎨Body: personal XP convert to Formal Argument

Poor Articulation	Better articulation
My brother's seven year old son does not even bother to open the BYJU'S e-learning tablet after returning from school until my bhabhi-ji scolds him. So e-learning is not suitable for Young learners.	Unsupervised young children tend to lack discipline in utilising e-learning platforms. Therefore, e-learning may not be suitable for every age.
old parents cannot chew thick chapati but evil daughter in law doesn't care. So old parents sleep half hungry and suffer malnutrition.	We should promote community kitchen / affordable tiffin services for the elderly who are unable to get appropriate food because of financial issues, physical ailment or careless/inhumane family members.

12.7 👩‍🎨 BODY: UNNECESSARY TABLE/ MINDMAPS/ CHARTS

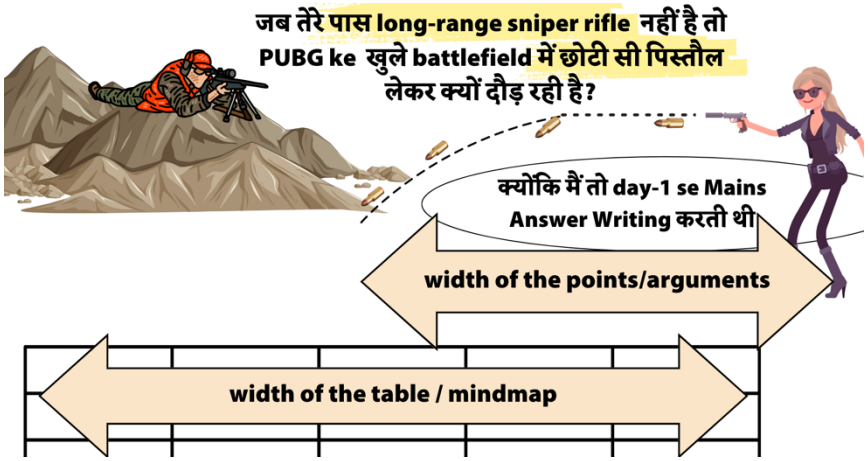

12.7.1 E.g. Unnecessary Tabulations: Intragenerational SDG

PYQ-2020: Explain intra-generational and inter-generational issues of equity from the perspective of inclusive growth and sustainable development.

(समावेशी संवृद्धि एवं संपोषणीय विकास के परिप्रेक्ष्य में, आंतपीढ़ी एवं अंतपीढ़ी साम्या के विषयों की व्याख्या कीजिए।)

Aspect	Inclusive Growth	Sustainable Development
intra-generational	obstacles faced by PH vs non-PH person in same age group while pursing education / career.	????
inter-generational	????	less water / crude oil / clean air available for the next generation.

- Candidate first drew the table/chart/mindmap, but only then he realised he does not have enough unique points to write in each and every cell.
- So he left the cells empty, leaving very poor impression on evaluator ki bhai tujhe sirf raita failaanaa aataa hai.

12.7.2 👩‍🎨 E.g. unnecessary Tabulations: FDI in Defense

PYQ-GSM3–2014: Foreign direct investment in the defence sector is now said to be liberalised. What influence this is expected to have on Indian defence and economy in the short and long run?

FDI in Defense	Impact on Economy	Impact on Defense
Short Term	Jobs creation	???
Long Term	India will be able to export arms → CAD reduced, GDP improved.	India will become such a military superpower that It will permanently deter some of our unfriendly neighbours from doing misadventures at the border while UNSC may be compelled to give us a permanent seat.

If you do not have enough unique differentiating points. Then better to write combined headings

- heading: impact on Indian economy (short term & long term)
    - Bullet blah blah blah
    - Bullet blah blah blah
- heading: impact on Indian defense (short term & long term)
    - Bullet blah blah blah
    - Bullet blah blah blah

12.8 👩‍🎨BODY: DID EXAMINER ASK BOTH POSITIVE AND NEGATIVE?

Year	2021	2017
ASKED	What are the main socio-economic implications arising out of the development of IT industries in major cities of India?	The growth of cities as I.T. hubs has opened up new avenues employment but has also created new problems.
Positive Implications	yes, need to be mentioned	Not the main highlight. Read tone carefully. उसका मूड ऐसा है कि हां नौकरियां तो खड़ी हुई है लेकिन नई समस्याएं भी खड़ी हुई है. इसलिए ज्यादा शब्द हमने उन समस्याओं पर लिखने होंगे
Negative Implications	Yes, need to be mentioned	Yes Asked.

12.8.1 👩‍🎨Example: Renewable Energy: -ve asked/NOT?

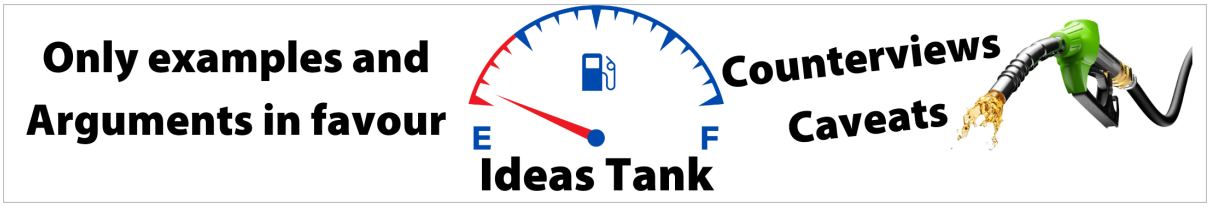

Year	2022	2020
PYQ	Do you think India will meet 50 percent of its energy needs from renewable energy by 2030 ?	Describe the benefits of deriving electric energy from sunlight in contrast to the conventional energy generation. What are the initiatives offered by our Government

Year	2022	2020
	Justify your answer.	for this purpose?
have to mention positive sides?	Yes	Yes.
have to mention challenges/negative sides?	Yes	Not asked. Read the tone carefully.

Solution?

- Read the Hindi version also to get a better idea
- Break down the sentence into multiple phrases then reflect.

12.9 🧑‍🎨 BODY: ESSAY - MAY HAVE TO SHOW NEGATIVE / COUNTERARGUMENT

GS Questions (150–250 words)	Essay (1000–1200 words)
If the counter argument/challenges/cons/comparison/caveats is NOT asked → u shouldn't write it	you may have to write it to fill the word limit. See the next section for more 👇

12.9.1 😢🧱 Essay- Maths = music of reason?

Mathematics is the music of reason (गणित तर्क का संगीत है) (2023-Essay)

Subject	How Maths reasoning imp /relevant?
Economy	➢ Money supply & interest rates, Direct Tax-Laffer curve, GST-ITC, GST compensation to states, FC-tax devolution, currency exchange, NEER-REER, SDR, GDP calculation, inflation, HDI etc
Polity	➢ Voting power of individual MP and MLA in the Indian Presidential election, electoral college system in USA Presidential election, Delimitation of the constituencies, determination of reservation quotas based on income / population.
Geography	➢ Longitude latitude, timezone difference. seismograph to monitor the earthquake. ➢ Earth is round, earth is not the centre of the universe, Earth is big. ➢ Unlike the British & Portuguese- the Mughals didn't invest heavily in Mapping and Navy- suffered consequently.
History Culture	➢ Radio-Carbon dating / half-life formula to find age of artefacts/fossils. Construction of large monuments such as pyramids.
Environment	➢ Air quality index, Prediction of the climate change, BS-stage emission

Subject	How Maths reasoning imp /relevant?
	norms etc
Science	➢ Every scientific formula is expressed using maths. Such formula help understand which variables are directly or inversely proportional e.g. ➢ Electricity transmission loss vs thickness of wires. ➢ How much blood pressure, blood glucose level, alcohol level is safe? Air traffic control, Missile trajectory, Drone flight, Artificial intelligence etc.
Current Affairs	➢ Corona reproduction number to calculate Super spreader events. ➢ Sports records keeping.

- ➢ But, If you only try to write essay by only giving applications/uses of mathematics in other disciplines such as economics, science-technology, history, geography, polity, et cetera then You will run out of examples **before you complete the word limit (1000-1200 words)**
- ➢ so then you also need to discuss the areas or cases where mathematics may not be a full music of reason.

12.9.2 😢🧱 Maths music can spread hatred

- Music can have negative impact on the character. e.g. Rap-songs glorify the use of guns, gangsters, and misogynistic attitudes against women.
- Similarly, Maths / Statistics can be weaponised in wrong hands to spread hatred against a community/migrant/religion/person e.g. **Hitler** selectively highlighting data on how Jews controlled entire German economy and **Jews** alone were responsible for all the economic problems of Germany.
- How **Cambridge Analytica** company misused the **Facebook** personal data to show targeted advertisements to American voters against Hillary **Clinton** to help Trump win.

12.9.3 😢🧱 Maths music can mislead

- E-Commerce websites pe companies sometimes use bots to write fake positive reviews of their products. Then Website's AIgo recommends such products (that have large number of positive reviews) to the Visitor.
- How some Start-up companies inflate/sugarcoat the growth projections to attract the investors then IPO-bubble collapses. e.g. PayTM-IPO, WeWork shutdown, Whitehat Junior shut down
- If the inherent data itself is faulty, mathematical reasoning will be counter productive. e.g. State "X" conducts caste census and recommends the extra reservation for "Y" caste but critiques say data is wrong.
- GDP divided by population = per capita GDP ke hisaab se Bangladesh >> India. Does it mean Bangladesh is a more powerful country than India?

12.9.4 😢🧱 Maths music hides inequality

- Need for OBC subcategorisation.

- Maths can help calculating GDP of a nation but this number hides income inequality and poverty in the country. So, new concepts required such as human development index (HDI) and Lorentz Curve and Gini-Coefficient. (Ref: Pillar#6)
- Maths says nominal currency exchange rate of 1 Dollar = ₹83 (2023) but does not truly reflect the impact of inflation that affects decisions of importers and exporters. So, new concepts required such as real effective exchange rate (REER). (Ref: Pillar#3)

12.9.5 😢🧱 Maths music ignores quality

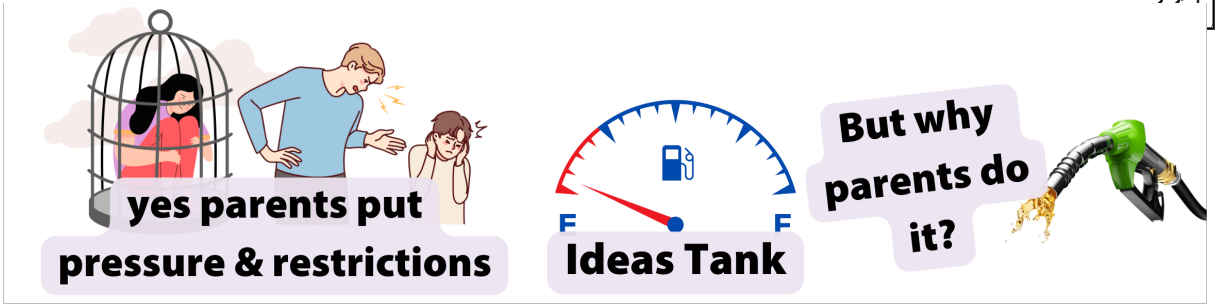

- Maths depends on data-survey/checklist/statistics. Qualitative aspects are difficult to be accommodated. e.g.
- Maths says Kohli's 49 centuries = Sachin's 49 centuries. But Sachin had to put more effort because (1) Sachin's era had tougher bowlers like Shane Warne, Murli, Shoaib Akhtar, Brat Lee, etc. (2) Nuisance of bowlers using **steroids and doing ball-tampering** was more prevalent in Sachin's era bcoz ICC did not have the adequate technology/tests to curb it. (3) Sachin's era had different rules on how many times a ball can be changed during a match.
- YouTuber **Elvish Yadav** has 14 million subscribers, whereas **Sachin** has only 1.33 million. So is Sachin a smaller celebrity?
- SRK's **Pathaan** movie earned over ₹1,000 crore- so is it a bigger cinematic masterpiece / has more re-watch potential than **Sholey or Hera Pheri**?
- **Conclusion: Yes Maths is music of reason BUT just like** calibre and character of the music-composer also changes the impact of music, here too, the calibre and character of the mathematician, statisticians & users of the datasets will determine the impact/consequences of mathematical reasoning.

12.9.6 🤦‍♀️ Essay- Girl pe restriction and Boys pe demands

Girls are weighed down by restrictions, boys with demands — two equally harmful disciplines. (लड़कियों पर पाबंदियों का बोझ होता है, लड़कों पर मांगों का - दोनों ही बोज/अनुशासन समान रूप से हानिकारक हैं।) (2023)

- If you write only example areas where girls face restrictions and boys face demands and how/why they're harmful- leading to depression and suicide BUT you will not have enough points to fill the word limit.
- So you also need to give the reasoning behind those restrictions AND / or do comparison between various societies e.g.

🙍‍♀️ 3rd World / Asian Societies	1st World/ Developed Nations
Parents / Hostel-wardens insist ke daughter should not go out in the night, because they care for her safety due to broken down law order and slow criminal justice system.	Less restriction on going out in night bcoz better faster justice, rape-victim not stigmatized.
Parents discourage daughter intercaste / inter-religion marriage. Because they may be worried if there is case of domestic abuse or divorce, it is difficult to get property rights / maintenance for the daughter from husband of different caste/religion- over whom girl's parents' own Panchayat/ caste leaders may not have the moral authority to & legal system is slow.	LESS because divorce, domestic violence and child care maintenance law are more strict.
Parents discourage daughter from divorce, live-in relationship & pregnancy outside marriage - due to concerns over the financial well-being of the daughter & her child.	Child care support laws are more strict, female labour force participation rate is high. So there is less taboo against such live-in, divorce, unwed mothers.
Boys face parents' demands to excel in life and provide decent income for the family because of (1) broken down social security system (i.e. health, insurance, pension, unemployment allowance, etc) (2) LESS avenues for daughters to find jobs to look after old parents. (3) Paying dowry of sister.	Parents do not put so much pressure on boys, because (1) Govt provides social security (2) higher female LFPR (Labour force participation rate) (3) no dowry system

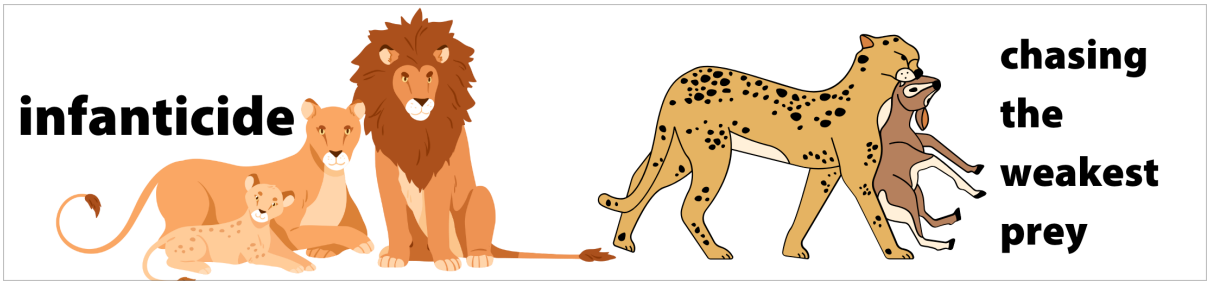

12.9.7 🦘 Essay: Forest = Economic excellence

Forests are the best case studies for economic excellence (आर्थिक उत्कृष्टता के लिए वन सर्वोत्तम केस स्टडी हैं) (2022-Essay)

Example/ parallels	Positive - economic excellnce
Hynes and Vultures	Scavenging, recycling, not letting any material go to Waste.
Honeybees, Ants	Division of labour and specialization of work.
Pack of wolves, Group of elephants, Pride of lions	benefits of corporation e.g. Amul
Galápagos finch- 13 species with	Importance of evolution for survival / product

Example/ parallels	Positive - economic excellnce
different types of beaks	diversification. **Mukesh Ambani's** Reliance transforming from oil giant to media-5G giant = success. Whereas **Anil Ambani** didn't grow from CDMA mobiles to 3G = failed.
Commensalism : one species benefits while other is not harmed. e.g. Orchids growing on trees	small company should explore such opportunities to ride on the success of big companies. e.g. making covers/cases for iPhones, seat covers for cars etc.
• 🦣🐢 **Slow moving animals have longer lifespan e.g. turtles (100 years), elephants. (60-70 years).** • **Fast moving animals have shorter lifespan e.g. Cheetah & Chinkara (max 15 years),**	➢ Companies focusing on organic / slow but natural growth = long lasting business e.g. Maruti cars. ➢ Companies focusing on faster / artificial growth through cashback/freebies/startup bubble / marketing = shorter lifespan e.g. Whitehat Junior, WeWork, etc.

😢 **But, If you only give examples in favour, you will not be able to fill the word limit (1000-1200 words) so you have to give counter-arguments as well.**

Example/ parallels	Counter-view -Economics vs Ethics
Survival of the fittest. Big fish eats the small fish. Older animals are abandoned by their group.	For economic excellence, this is required but it may not result into social justice.
Parasitism: A tick/fleas sucking blood from the deer's body.	For economic excellence, this may be justified if social media company sucking personal data of users for targeted advertisements, but this is not ethical / it can be misused.
Lion infanticide: female lions will not be receptive to sex/mating while they are nursing the cubs. So male lions sometimes kill the cubs to get female ready for mating/sex again.	Apple deliberately (unethically) slowing down the older iPhones through hidden software Update to ensure the customer buys new iPhone.
Lion infanticide: Female lions sometimes abandon/kill handicapped cubs- for prevention of misdirected parental care	if a company feels customer no longer has money to buy more stuff OR customer is near end to his warranty-lifecycle, they will stop responding to his

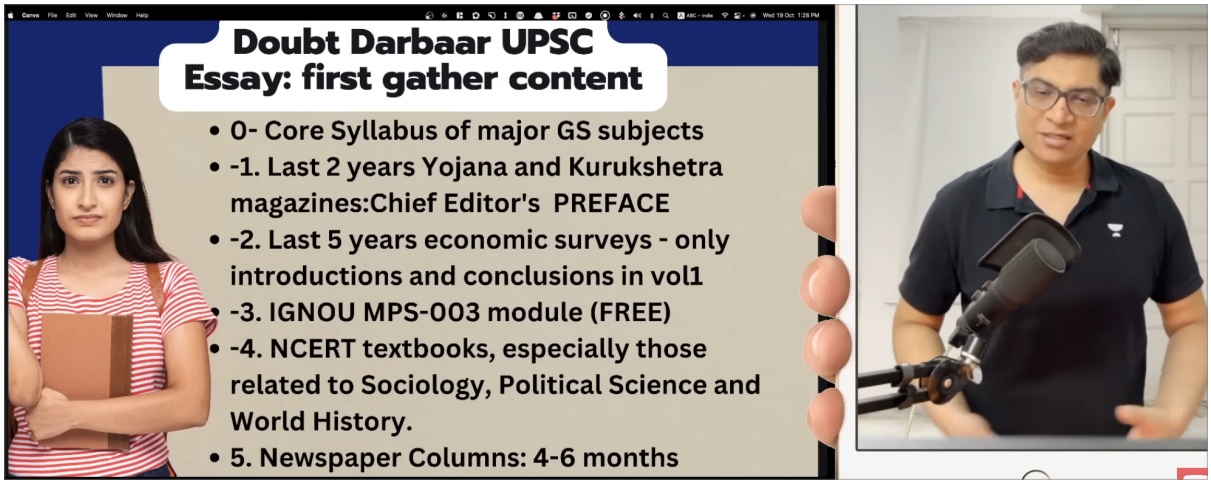

Example/ parallels	Counter-view -Economics vs Ethics
& access to limited resources (food).	problems.
If Female lion has single cub, she may abandon It - for prevention of misdirected parental care viz low chances of survival of single child. If she has a litter (3–4 babies), she'll take care of it	if company feels that TAM (total addressable market) is low → they will/should abandon it, even though some customers may require the services of the company. e.g. shortage of optional subject teachers in certain low popular subjects.
Wolves/Cheetahs usually hunt the youngest/weakest member of the deers/wild buffaloes because they are easier to kill.	Companies ads targetting children and adolescence because they are easier to convert into sales/subscribers than adults. This becomes unethical in promotion of beauty products, & how some children steal from parents to buy video games.

12.9.8 ⚓ Essay: A ship in harbour is safe

A ship in harbour is safe, but that is not what ship is for (बंदरगाह में एक जहाज़ सुरक्षित रहता है, लेकिन जहाज़ बंदरगाह में रहने लिए नहीं बना है)(2022-Essay)

If you only write arguments in favour and examples from history, geographic explorers, scientific innovators, business entrepreneurs, → you will not be able to fill up the word limit (1000–1200 words). So you may also give counter arguments where a ship in harbour is safe. E.g.

- Military and bureaucracy works with discipline, rules, protocol and manuals. If a young officer abides by them, he will get timely promotions. **Faaltu ka hero banane jaayegaa** then it will cause unnecessary risk to the organization, his platoon and his own career.
- Instagram reels ke chakkar mein many youngsters have lost their live by falling into the dam / ocean / mountain cliff etc.
- Faulty Business strategies of startup companies that centre around creating new demand by giving freebies/discounts/cashbacks- but such bubble doesn't last forever. e.g. PayTM IPO bubble burst.

12.9.9 🤷‍♀️ FAQ: I can't write good essay, don't have content, how to handle philosophical essays?

The 3-4 essays' examples that i gave in previous section- **I wrote those points without consulting ChatGPT/Google.** This requires

- **Mental tranquillity / focus** (=Whatsapp DE-Addiction, avoiding company of faaltu / 2-rupee-people.)
- **Diversity in reading various topics** (= not relying entirely on the monthly PDF files. Reading the newspapers / supplementary books, and having your own thought processes.)

12.10 👩‍🎨 BODY: KEEP SPOTLIGHT ON THE PROTAGONIST

Q : Keep Spotlight on		NOT on
After solar electricity becomes cheap what will be the impact on thermal power plant owners?	**Thermal power plants**	Solar company, customers, government
How is the government of India protecting traditional knowledge of medicine from patenting by pharmaceutical companies?	**Govt**	Patient, Doctor, Pharma Companies.
What counter-measures should be taken to prevent the drug trafficking and human trafficking?	**Govt**	Not on How it harms addict / society / internal security. It is presumed ke ye dangerous hai. Question is asking in about what government needs to do.

12.11 👩‍🎨 BODY-LANGUAGE- "LEAVES MUCH TO BE DESIRED"

Read and absorb the following table peacefully. Don't just scroll down like WhatsApp message.

Average	Better
SEBI has failed to prevent scams. e.g. Karvi Capital, NSE colocation, finfluencers etc.	SEBI's regulation over financial markets **leaves much to be desired,** especially when considering recent cases such as Karvi Capital, NSE co-location etc. Proactive, precautionary and preventive actions are always better than conducting surgery, autopsy and post-mortem after the cancer has spread.
Only after the scam happens, SEBI will be in ban persons e.g. Zee founder Subhash Chandra. Then banned person will appeal to SAT and cases drag for decades. Common men do not feel any justice has been done in reality and that they should avoid share market.	SEBI's regulatory framework should prioritize preventative measures over post-incident investigations. The persistent appeals launched by the accused parties, and the resultant delay in justice, undermine the confidence of small investors in the capital market.

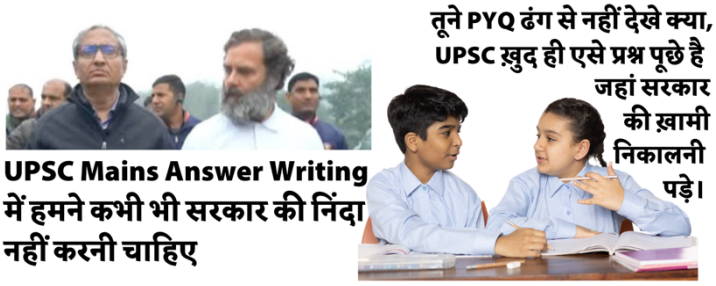

Average	Better
Indian banking system is biased towards the rich and influential people. it will not pass the loans for poor people easily while Vijay Mallya and Nirav Modi borrowed crore and ran away.	While looking at the loan disbursals, the inclusivity aspect of the Indian banking system **leaves much to be desired.** Loan default cases involving Vijay Mallya and Nirav Modi are not helping to change this perception.
on one hand, people like Adani Ambani and the startup hotshots are earning crores of rupees thanks to the business friendly policies of the government, but on the other side government has failed to improve the human development in India as evident from the UNDP's HDI index.	On the economic front, the business friendly policies of the Government has helped the individual entrepreneurs to flourish, but on the human development front, **there is much scope for improvement** when it comes to hunger and malnutrition. While India has made strides in the economic growth thanks to the business friendly policies of the government, its score human development index **leaves much to be desired.**
India's human development score is shockingly low when compared to China's!	India's human development score **leaves much to be desired** when compared with some of its neighbors.
There is lack of innovation in India.	India's rank has improved in the global innovation index in recent years. However, there is **still room for improvement** as Malaysia, Singapore, China, and South Korea are ahead of us in this ranking.
India's relation with China has turned bitter in the recent years.	India-China relations have deteriorated after x event or over y issue. The relationship has reached an all-time low following the x event. The ties between India and China are strained due to xyz.

12.12👩‍🎨Body: Graceful Vocabulary

Average/Poor	Better
Film reviewer criticized Adipurush was for having Rowdy/Tapori-type dialogues.	…..having colloquial dialogues.
Pakistani politicians's comment on Indian democracy was pathetic.	…..It was in poor taste / It was not in good taste / It was unwarranted.

So how to improve vocabulary? Ans. At this stage, you cannot spend time learning the dictionary, but have a habit of reading / listening to good Newspapers / YouTube News channels to consume current affairs. E.g. Doordarshan / Vantage with Palki Sharma / BBC-Hindi.

12.13👩‍🎨🦁BODY: NEVER CRITICISE GOVT?

⇒ depending on the requirement of the question, you can list the deficiency of the government with data and rational arguments, without politically motivated personal attacks.

⇒ sometimes UPSC itself has asked questions in negative tone e.g. limitation of NHRC, NCW, PRI Bodies, failure of the successive governments to control poverty and hunger.

⇒ So you need to show the intellectual maturity convey the thoughts like an officer.

12.13.1 👩‍🎨Example: BBBP: criticising govt logically

⇒ Despite the Beti Bachao, Beti Padhao (BBBP) Yojana, there has been consistent decline in the in child sex ratio at birth in Bihar, as per the Registrar General of India.

State	2020	2021	2022
Bihar: Girls-per 1000 boys	964 girls	908 girls	891 girls

⇒ According to a parliamentary report, 80% of BBBP funds are spent on media campaigns only.

⇒ However, the reluctance / negative attitude of the parents to have a girl child cannot be changed only through advertisements.

⇒ The root issues behind female infanticide need to be solved including 1) expensive education/coaching, 2) dowry/divorce/domestic abuse, 3) rape/molestation-social stigma and delay in justice, and 4) apprehension of parents who will take care of them in old age, etc.

⇒ These require legal, administrative, police, and judicial actions on a war footing.

⇒ Successive governments have taken steps in making stringent legal provisions for rape/murder, child abuse/POCSO, domestic violence, reservation for women in state government jobs, and local bodies, etc.

⇒ But after 1) looking at the disturbing news reports of violence against women, 2) only a marginal improvement in the child sex ratio, 3) suboptimal performance in the gender indices at global level compared to some of our neighbouring countries- only more needs to be done for complete gender justice and women empowerment in India. Then link with SDG/fundamental duty/DPSP, etc. to conclude.

12.14👩‍🎨BODY: VERBOSE VS CONCISE EXPRESSION

VERBOSE Expression (शब्दबहुल अभिव्यक्ति)	Concise Expression (संक्षिप्त अभिव्यक्ति)
if a farm labourer does not know how to fill up online forms, then after digitisation of welfare schemes, he will have to travel to nearby town & pay money some agent/ middleman to fill up online	digitisation of welfare schemes may increase the transactional cost and hardship for the beneficiary if they lack digital literacy. (यदि लाभार्थीमें डिजिटल साक्षरता का

VERBOSE Expression (शब्दबहुल अभिव्यक्ति)	Concise Expression (संक्षिप्त अभिव्यक्ति)
form, and in the process he will also lose a day's wage for not being able to work in the farm because of that travel.	अभाव हो, तो कल्याणकारी योजनाओं के डिजिटलीकरण से लाभार्थी के लिए लेनदेन लागत और कठिनाई बढ़ सकती है)
Pakistan is accusing India of human rights violations in Kashmir at the UN, but the Pakistani Army has its own history of suppressing dissent and restricting freedoms, jailing journalists and opposition party leaders. Therefore, it is very hypocritical on the part of Pakistan to accuse India of this.	Pakistan accusing India of human rights violations is like the pot calling the kettle black.
If we were to permit 100% Foreign Direct Investment in News Channels, it's possible that foreign-owned TV channels may focus more on news that interests their global and Western audience, like the Russia-Ukraine war, football, and Hollywood gossip. This could mean that local news stories, such as municipal corruption, festival celebrations, and state-level politics, might not get as much attention.	Increased FDI in news channels may prioritize global and Western interests, potentially neglecting local news stories and promoting homogenization of news content.
Taliban has ordered women to stay at home, and leave their college studies and jobs. Meanwhile, Girls especially from the minority groups are abducted, forcibly married, raped and murdered.	Taliban is enforcing **gender apartheid** in Afghanistan.
So many man-hours are spent in excel data analysis, building html pages, testing software codes, replying to customer emails, editing photos, videos and digital graphics. Generative artificial intelligence can help automating all this to save the time and effort of human workers.	Generative AI can reduce the **digital drudgery** of workers.
There is a vast range of issues such as punctuality of the train arrival, financial performance, physical safety, organisational/human resource issues, project execution, customer relations, and so on that need to be reviewed and the necessary course corrections effected. Nation can ill-afford to let the performance of its prime transporter and its largest public undertaking to be judged merely on the basis of the number of Vande Bharat trains introduced, the glitz and opulence of its remodelled stations	Performance of Indian Railways should not be evaluated from just a few well-publicized vanity projects.

VERBOSE Expression (शब्दबहुल अभिव्यक्ति)	Concise Expression (संक्षिप्त अभिव्यक्ति)
Section 376 of the Indian Penal Code (IPC) only deals with rape against women while Section 377 deals with rape of men, transpersons and animal. But with the non-inclusion of Section 377 in the Bharatiya Nyaya Sanhita (BNS), rape of men, transgender and animal will become a non-offense post July 1, 2024.	BNS has doesn't have a gender-neutral definition of rape.

So what type of answer we should write? Ans.

⇒ It depends word limit vs no. of points you've. As long as you have more points/arguments, better use concise expression, to fit more points in the body.

⇒ idioms/proverbs can help you save a lot of word limit e.g. Pakistan accusing India of human rights violations is like the pot calling the kettle black.

⇒ However, **do not waste time buying a book on idioms/proverbs.** In real exam you will not know how to use such long list. You have to cultivate it through reading of real life news columns where such idioms are used.

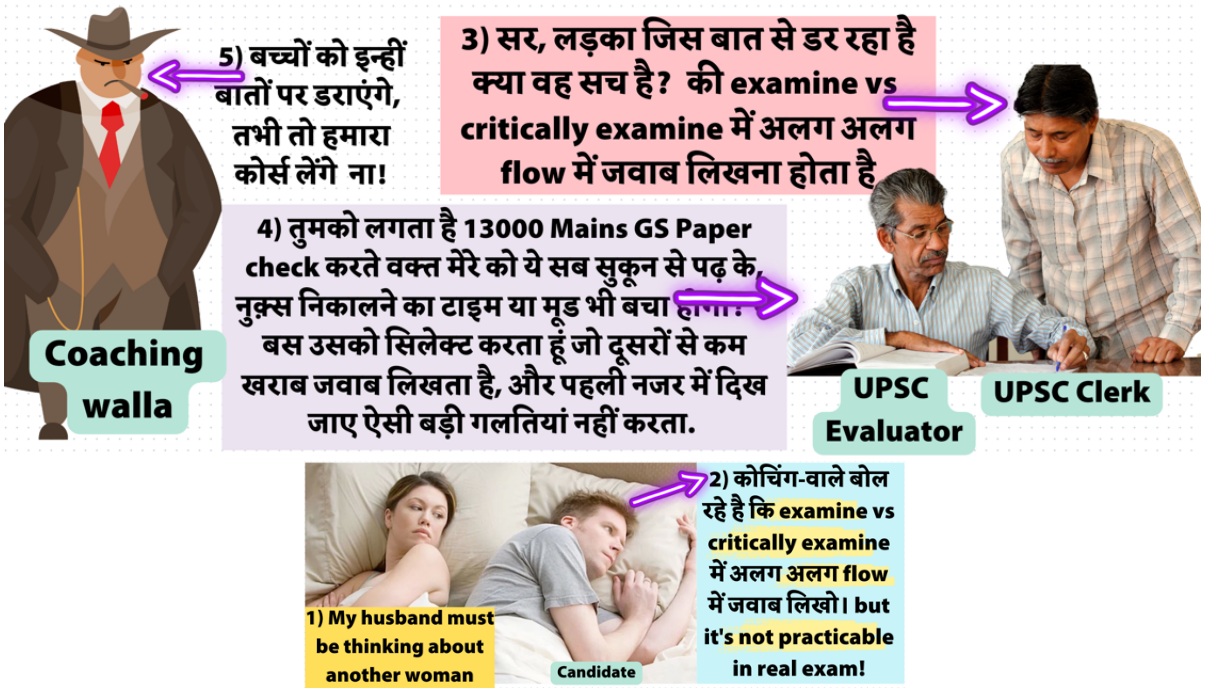

FAQ by Zhande-walle Babushone: "X" Royal Entry topper said vocab not important. Simple english is enough!!! Ans. Do you know his full story? academic background? He is command language from School College? His luck factor in optional scaling and interview panel? महेनत की प्रेरणा लो। कामचोरी का बहाना मत ढूँढो।

12.14.1 Body: Compress vs Elaborate

Compressed	Elaborated
if Aadhar card data is leaked, it could be misused in variety of ways.	If Aadhaar card data is leaked, it could be misused in a variety of ways, such as impersonation, cyberfrauds, banking frauds, acquiring SIM cards by terrorists, unwanted marketing calls, influencing the voters through targeted ads, stalking, and harassment of females, etc.

So when to elaborate and when to keep it compressed? Ans. Depends on the requirement of the question and word limit. You need to have that maturity. (विधार्थी की परिपक्वता होनी चाहिए की कब खींचना है, कब संक्षेप में लिखना है।)

13 PART-C: DIRECTIVE WORDS: DISCUSS VS EXAMINE

PYQ	if I change the directive word…
GSM2–2014: **Discuss** the political developments in Maldives in the last two years. Should they be of any cause of concern to India?	**Examine critically** the potential impact of the last 2 years' political developments of Maldives on India.
GSM2–2014: China and Pakistan have entered into an agreement for development of an economic corridor. What threat does it dispose for India's security? Critically examine.	Enumerate the threats/challenges posed by China-Pakistan economic corridor.

- In above questions, even if I change the directive word,…Not a single word will change in the model answer.
- Yet, some armchair experts / Delhi-Coaching-**MAFIAs** unnecessarily create pedantry / **fear-psychosis / mass-hysteria** around this ke
- Your answer it needs to be different for "discuss" versus "examine critically."
- Neither it is possible for the student to do write different set of arguments for each question, in real exam, nor the evaluator has the time or appreciation quality to read and judge it.

Having said that, here are a few things to keep in mind.

Discuss, Elucidate, Explain, Elaborate, Substantiate, Enumerate/outline,	**Analyse, Critically Analyse, Evaluate, Examine, Critically examine, Discuss Critically**
basically, you narrate the things that you know, with some examples.	usually (NOT ALWAYS) you have to arrive at some stand ke 'yes/no/partially agree/disagree/x-is-bad-y-is-better etc.
Discuss, why India has distanced itself	Critically examine what threat does CPEC pose

Discuss, Elucidate, Explain, Elaborate, Substantiate, Enumerate/outline,	Analyse, Critically Analyse, Evaluate, Examine, Critically examine, Discuss Critically
fromChina-Pakistan Economic Corridor (CPEC). Answer-flow= give the list in body and conclude, ke because of the aforementioned reasons, India has not joined.	for India's security? Answer-flow= here also give the list. And conclude with the graded adjective ke thus it poses grave/serious/very series/extreme/ unprecedented threat to India and needs to be countered with suitable response both at the border level / United nation level/military level/diplomatic level.
In respect of India — Sri Lanka relations, discuss how domestic factors influence foreign policy. Answer flow = give the list with example.	What are 'Smart Cities? Examine their relevance for urban development in India. Will it increase rural-urban differences? = so here your flow of argument needs to reach to a conclusion ke Yes/No/Agree/Disagree.
Livestock rearing has a big potential for providing non-farm employment and income in rural areas. Discuss & suggest suitable measures to promote this sectors in India. Answer flow = give the list. No need for excessive negativism regarding what are the present challenges.	Examine the developments of Airports in India through Joint Ventures under Public-Private Partnership(PPP) model.= you have to reach a conclusion that airport development via PPP is satisfactory/ non-satisfactory, more needs to be done.
The terms 'Hot Pursuit' and 'Surgical Strikes' are often used in connection with armed action against terrorist attacks. Discuss the strategic impact of such actions. Answer-flow= Haan toh de do list. You must be having a encyclopaedic knowledge about this after watching all those Ek-tha-Tiger James Bond videos.	Examine the impact of liberalization on companies owned by Indian. Are they competing with the MNCs satisfactorily? = Answer-Flow: the effect has been positive/negative/mixed, Indian companies are competing against MNC satisfactory/non-satisfactorily for XYZ sectors
What do you about the terms of reference of the recently constituted Finance Commission? Discuss. Ans- then simply list the ToR without getting into the objections by the opposition parties / State government.	Should contract farming and land leasing be promoted in agriculture? Critically evaluate the pros and cons. = Answer-Flow: you have to arrive at conclusion whether we should promote this or not, and IF yes then with what safeguards?.
'Simultaneous election to the Lok Sabha and the State Assemblies will limit the amount of time and money spent in electioneering but it will reduce the government's accountability to the people' Discuss. Ans-Flow: Examiner	examine the extent to which India has successfully developed a comprehensive National Cyber Security Strategy. Answer-flow= in the body, give list where we succeeded and failed e.g. how cybersecurity collapse completely during wanna

Discuss, Elucidate, Explain, Elaborate, Substantiate, Enumerate/outline,	Analyse, Critically Analyse, Evaluate, Examine, Critically examine, Discuss Critically
himself gave u hints on pros and cons. You just have to elaborate it with data, examples, concerns. Conclude on +ve note ke benefits outweigh challanges, should proceed further taking inputs from stakeholders to minimise the impact of challanges.	cry ransomware etc. then conclude with judgement: india, cyber security strategy is successful/not fully successful/mixed result/still evolving/epic failure/ etc.

⇒ However, **UPSC examiner himself is randomly slapping directive words without due thought,** even in the question is where the particular directive word is not suitable due to nature of question / word limit. e.g.

⇒ **2017:** 'China is using its economic relations and positive trade surplus as tools to develop potential military power status in Asia', In the light of this statement, discuss its impact on India as her neighbor.

⇒ **2013:** Discuss the impact of FDI entry into multi-trade retail sector on supply chain management in commodity trade pattern of the economy.

⇒ Ideally, in above question the examiner should have use the word, analyse or critically examine.

⇒ so do not lose sleep over the directive word too much

⇒ Every answer requires DIFFERENT SET OF LOGICAL ORDER depending on directive word = = This is also very 'idealistic talk'. Not always possible to do in real life exam.

⇒ But, Just like the **pre-wedding photographers, 'faaltu ki haawa'** has been created around all this.

14 PART-D: CONCLUSION

14.1 CONCLUSION: INTENSITY OF THE EFFECT: POSITIVE OR NEGATIVE EFFECT

Positive Words	Negative Words / Antonyms
Rapid /Swift	Slow /Sluggish
Extensive	Limited
Drastic	Mild
Profound	Superficial / Muted/Subdued
Visible	Invisible
Substantial	Insignificant
Considerable	Negligible
Remarkable / Noticeable/Notable	Ordinary /Unremarkable
Decisive	Indecisive
Conclusive	Inconclusive
Prominent /Conspicuous	Insignificant
तेज, व्यापक, भयानक, गहन, उल्लेखनीय, निर्णायक, प्रमुख	धीमा, सीमित, हल्का, सतही, अदृश्य, सामान्य, अनिश्चित, अनिर्णायक, तुच्छ,

⇒ Thus, caste continues to have a profound effect on the choice of candidates in Indian elections. (- इस प्रकार, जाति का भारतीय चुनावों में उम्मीदवारों की पसंद पर गहरा प्रभाव रहता है।)

⇒ Thus, despite the concrete efforts by FM and RBI, our GDP growth remains sluggish/muted. (- इस प्रकार, वित्त मंत्री और आरबीआई द्वारा ठोस प्रयासों के बावजूद, हमारी जीडीपी विकासदर सुस्त/मौन बना हुआ है।)

⇒ Thus, despite China deploying considerable resources in CPEC, its return on investment is negative or negligible at best. (- इस प्रकार, चीन द्वारा सीपीईसी में काफी संसाधनों को तैनात करने के बावजूद, चीन को मिलने वाला मुनाफ़ा नकारात्मक या नगण्य है।)

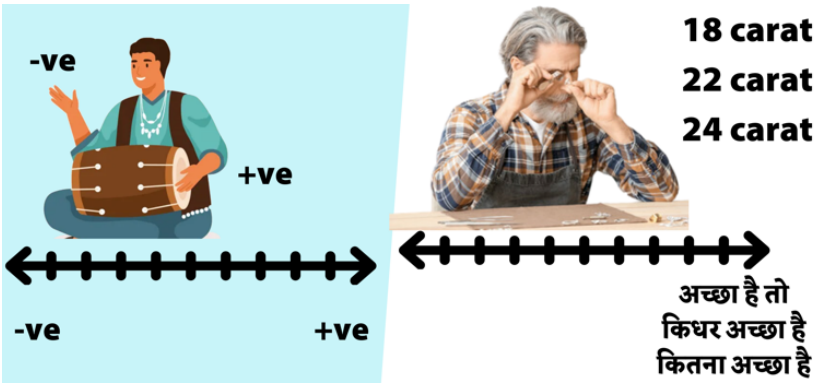

⇒ Thus, UPI has made a profound impact on promoting the digital economy in India. (- इस प्रकार, यूपीआई ने भारत में डिजिटल अर्थव्यवस्था को बढ़ावा देने में एक निर्णायक भूमिका/असर अदा की है।)

⇒ Thus, while cryptocurrency-related start-ups have created new jobs in ICT-hubs of India, Indian investors have suffered a substantial loss in bitcoin investments. Therefore, the impact of cryptocurrency on Indian society is overall negative. (-इस प्रकार, हालाकि एक तरफ़ क्रिप्टोक्यूरेंसी-संबंधित स्टार्ट-अप ने भारत में नई नौकरियां पैदा की हैं, किंतु भारतीय निवेशकों को बिटकॉइन निवेश में भारी नुकसान हुआ है। इसलिए, भारतीय समाज पर क्रिप्टोक्यूरेंसी का प्रभाव कुल मिलाकर नकारात्मक ही कहा जा सकता है।)

Sometimes, effect is NEITHER totally positive or totally NEGATIVE so you can use words - average, moderate, medium, neutral (औसत, मध्यम, तटस्थ, ना अच्छी ना बुरी)

- According to critics, despite demonetization, the tax:GDP ratio has witnessed only moderate improvement. Therefore, the effect of demonetization on combating black money was limited and not profound. (आलोचकों के अनुसार, विमुद्रीकरण/नोटबंधी के बावजूद, कर: जीडीपी अनुपात में केवल मध्यम सुधार देखा गया है। काले धन का मुकाबला करने में विमुद्रीकरण की भूमिका सीमित थी, और गहरा नहीं थी।)

14.2 Graded Conclusion

14.2.1 Graded Conclusion, not Double-Dholki: E-Learning

Conclusion	Poor Conclusion	Better 'Graded' Conclusion
E-Learning	……thus it has both positive and negative aspects.	may prove effective for the higher education in competitive exam, but not so much for school learning due issues of learner's self-discipline, need for real-life peer-interactions for building character, empathy, and tolerance.
Work from Home & family relationship	…..thus Work from Home both positive and negative impact on the family relationship.	Work from home can have positive impact on the family relationship provided that family members respect each others' physical and emotional boundaries especially during office hours.

14.2.2 Graded Conclusion, not 1-sided: E-Court

Conclusion	Poor Conclusion 2 sided	better 'graded' conclusion
E-hearing in courts	…..thus E-hearing is the need of the hour for speedy justice in India. It should be adopted everywhere from district court to Supreme Court for every case from traffic challan to terrorism.	E-hearing more suitable for civil cases & corporate law-suits, but has certain operational challenges in criminal matters and cases involving rural / poor / elderly petitioners. Keeping this in mind, it should be adopted in a staggered/phase-wise manner.

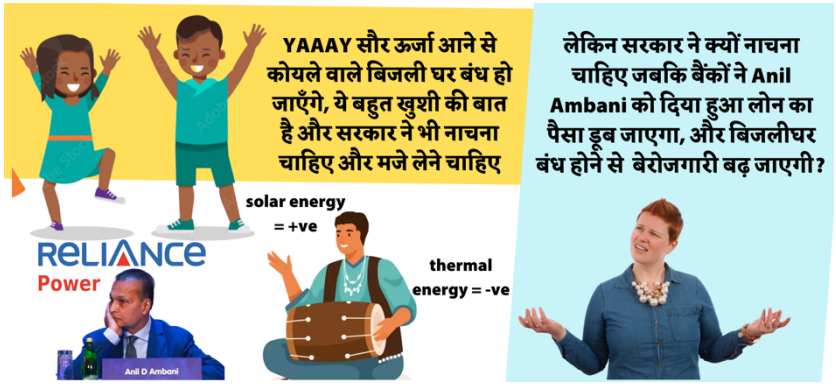

14.2.3 Graded Thinking: Thermal power plant will shut down?

GSM3–2016: solar power equipments & solar electricity prices are becoming cheap. Q1) What are the reasons behind it? Q2) What implications does this trend have for the thermal power producers?
Regarding Q2: 🤔Points to Reflect:

⇒ Cheap solar electricity will increase competition / price war for thermal power producers that are already suffering from losses for variety of reasons such as 1) coal shortage 2) labour strikes 3) Delay in subsidy release etc.

⇒ However, it will be wrong to assume that the thermal powerplants will shut down completely because

- 1) solar energy is non-dispatchable energy (=not available 24/7 on demand). Add the storage cost is prohibitive.
- 2) Solar energy is still expensive, than thermal energy.
- 3) shutting down of the coal-based power plants will create NPA problem for banks and unemployment for the workers. So it is likely that the government will eventually provide some type of subsidy / bail-out to the sector.

Way forward / Conclusion: A healthy mix of both renewable and conventional energy is the need of the hour. Both the thermal power plant owners & the government need to take remedial steps for it.

14.3 Positive Conclusion needs to match Body's Vibe

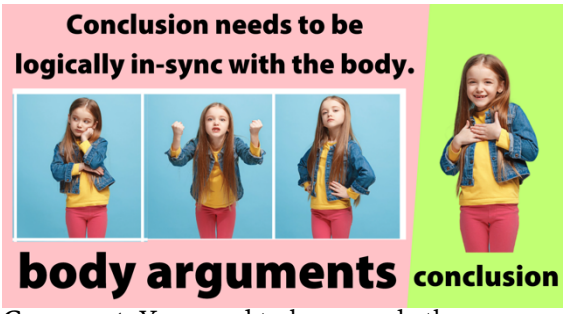

PYQ-2019: Do you agree with the view that steady GDP growth and low inflation have left the Indian economy in good shape? Give reasons in support of your arguments.

Body: flow of arguments: when it has left Indian economy, but, there are some areas of concern:

BODY ARGUMENTS:	CONCLUSION POINTS
current account deficit remains a concern	we need to boost exports

BODY ARGUMENTS:	CONCLUSION POINTS
inequality of income, unemployment	need to focus on the inclusivity aspect of the growth.
manufacturing sector needs to create more jobs, aid in exports, assemble in India etc.	need to focus on innovation and skilling of youth
scope for more number of Unicon start-ups from India	need to focus on innovation and ease of doing biz.

Conclusion: Yes, it has left Indian economy in better shape. And our next agenda of action should be to curtail bad loans & inequality, improve exports, focus on innovation, reap the demographic dividend to skilling of the youth- to become a developed nation by 2047.

Comment: You need to have made these arguments in the body part before you summerize them in the conclusion. Some people randomly add such points in the conclusion, and then evaluator gets confused ki tum ye point kidhar se le ke aaye?

14.4 Negative conclusions - Yes, there can be

PYQ-2021-GSM1: Cryptocurrency? How does it affect global society? Has it been affecting Indian society also?

- Conclusion: Thus, cryptocurrency is affecting both global and Indian society, and **more so in negative ways** than in positive ways - primarily due to financial scams and loss of savings after the crypto-winter.

PYQ-2020-GSM1: Has caste lost its relevance in understanding the multi-cultural Indian Society? Elaborate your answer with illustrations.

- Barring some pockets of urban Indian society, caste continues to affect everyday life - from an SC couple facing difficulty in renting/purchasing a home in cities to a political party fielding a candidate for election. Thus, caste has NOT lost relevance in Indian society. We cannot understand multicultural Indian society without studying caste.

14.5 Conclusion templates

⇒ X thing is important for SDG/making India developed nation by 2047/DPSP/to realise the dream of XYZ famous personality.

⇒ But Y thing is creating a challange/problem.

⇒ Therefore, Z reform should be done by Government/RBI / it is therefore need of the hour. OR it is an appreciable step by the XYZ.

PYQ-GSM3–2017: Mob violence is emerging as a serious law and order problem in India. By giving suitable examples, analyze the causes and consequences of such violence. similar questions on naxalism, terrorism, extremism have been asked in various years.

- **Conclusion:** mob violence hampers SDG 16 (Peace, Justice, and Strong Institutions) by eroding social cohesion and fostering a culture of fear and mistrust. Need of the hour is to….XYZ.
- This conclusion writing template will make more sense to you when you complete my entire course on economy Mains. But, Do not unnecessarily push SDH for every conclusion.

GSM2–2014: Discuss Pros and Cons IF we allow 100% FDI in News channels.

Average/poor conclusion	Good conclusion (Summarise the pros and cons)
Jabarjasti linking it with SDG goal for accountable institutions, job opportunities, Women empowerment etc.	Thus, While it could bring much-needed capital, technological advancements, and international collaboration, there are legitimate concerns about compromised editorial independence, the impact on domestic media outlets that needs to be taken into account before allowing it.

14.6 🔠 Sample Intro and Conclusions from few Economy PYQs-2023

🔠 **PYQ-2023: Faster economic growth requires increased share of the manufacturing sector in GDP, particularly of MSMEs. Comment on the present policies of the Government in this regard.**

🌤️ **Intro:**

- (Definition:) MSME means a firm with investment not more than 125cr & Turnover not more than 500cr. (after 👛Budget-2025 reforms)
- Internal subtypes: Micro small and medium.
- (Data) as per Economic Survey 2023: employ more than nine crore people and export more than ₹9 lakh crore worth goods and services.
- (Examples) Govt taken following steps to help them

👋**Conclusion:** Government has taken appreciable step by launching MSME schemes. This will help in a long way for

- (SDG 1) No Poverty, (SDG 8) Decent Work and Economic Growth
- (SDG 5) Gender Equality: 2 out of 9 cr MSME workers are women.
- by 2047 make India developed nation.

🔠 **PYQ-2023:Most of the unemployment in India is structural in nature. Examine the methodology adopted to compute unemployment in the country and suggest improvements. (भारत में सबसे ज्यादा बेरोजगारी प्रकृति में संरचनात्मक है। भारत में बेरोजगारी की गणना के लिए अपनाई गई पद्धति का परीक्षण कीजिए और सुधार के सुझाव दीजिए)**

- **(Definition:)** structural unemployment occurs due to Lack of jobs when person's skill/qualification is insufficient for the jobs available in the market.
- **(Origin)** in India, unemployment related data is survey / published by National Statistical Office (NSO)

- **(Data)** in last 3 years (2018–21) unemployment rate % has been 8.7%, 8.8%, 7.5% respectively.
- following reforms are required in the unemployment survey/ calculation methodology.

✍️ **Conclusion:** - without accurate data, impactful policies/ schemes schemes cannot be created. so need of the hour is to fix lacunas in unemployment estimation, for reaping the demographic dividend.

🔠 **PYQ-2023: What is the status of digitalization in the Indian economy? Examine the problems faced in this regard and suggest improvements (भारतीय अर्थव्यवस्था में डिजिटिकरण की स्थिति क्या है? इस संबंध में आने वाली समस्याओं का परीक्षण कीजिए और सुधार के लिए सुझाव दीजिए।)**

- (Definition:) Digitalization in the economy is the process of integrating digital technologies into all aspects of economic activity, from production and distribution to consumption and employment.
- (Origin) This digitalization process started after LPG reforms, and catalysed during Corona lock down- with the increased use of e-commerce, card payment, UPI, E-learning etc.
- talk about problems / remedies.

✍️ **Conclusion:** yes, we need to improve digitisation for

- (SDG 8) Decent Work and Economic Growth
- (SDG 9) Industry, Innovation, and Infrastructure
- To make India developed nation by 2047.

🔠 **PYQ-2023: State the objectives and measures of land reforms in India. Discuss how land ceiling policy on landholding can be considered as an effective reform under economic criteria. (भारत में भूमि सुधार के उद्देश्यों एवं उपायों को बताइए । आर्थिक मापदंडों के अंतर्गत, भूमि जोत पर भूमि सीमा नीति को कैसे एक प्रभावी सुधार माना जा सकता है, विवेचना कीजिए।)**

- (Definition) Land ceiling refers to the maximum amount of land that an individual is legally permitted to own. His/her surplus land is then seized by Government & redistributed to landless farmers.
- (Origin) after independence, land ceiling measures had been adopted by various state governments. Jammu Kashmir and West Bengal observed more success in it than others- says historian Bipin Chandra.
- (Data) As of 2020: Hardly 0.1% farming families own >10 ht. Over 86% farming families own 2ht or less.

✍️ **Conclusion:**

- if land ownership / tenant rights are clear then Farmer can get loans easily. More motivation to make long term investments in farm & aquaculture, beekeeping etc.
- Therefore need of the hour is to promote land reforms for 2x farmer income, SDG Goal for zero hunger thru increased the food production etc.

🔠 **PYQ-2023: What are the direct and indirect subsidies provided to farm sector in India? Discuss the issues raised by the World Trade Organization (WTO) in relation to agricultural subsidies.**

🌤️ **Introduction**

- (Origin) governments across the world provide agriculture subsidies for 3 objectives 1) poverty removal / income support to poor farmers 2) food security via enhanced food production. 3) export competitiveness.

- (Data) India is no exception to it. We provide over 1.75 lakh cr (food subsidy) + 1.97 Lakh cr (fertiliser subsidy) = over 3.70 lakh crore as of 2023–24.

✍ **Conclusion:** WTO noble aim but India can't abide

- Thus, WTO ceiling on agriculture subsidies are designed with Noble objectives. But India does not abide with it because 1) % limits are unfair to developing nations 2) India required to give subsidy for income security for the farmer and nutritional security for the poor.
- successive summit of WTO have failed to resolve this deadlock. Presently a 'ceasefire' is in effect through 'peace clause' in AoA (agreement on Agriculture).
- need of the hour is to address it with a permanent solution for - (SDG 2) Zero Hunger and - (SDG 12) Responsible Consumption and Production

14.6.1 👩🏫 Homework Before the Next Class

⇒ From next class will start with the economy for Mains.

⇒ Brush up with Prelims Economy ke Pillar#1 Handouts (Money, Banking, Finance, Insurance) before coming.

⇒ I will directly jump to the Mains related issues. WILL NOT teach CRR/SLR/CBDC/Bitcoin etc. basic theory again. वो आपको पता होना चाहिए।

⇒ Format of my handouts is PCB# (paid classes) followed by Win## (free annual updates).

⇒ it is similar to iPhone## (paid) and iOS Software (free update)

15 🔠 Appendix: Grammar, Spelling, Language

Note: it is possible that I may have violated the many grammar rules in my own handouts because every time, I do not have the time to fix the spelling and grammar by feeding it to chatGPT/Grammarly software. लेकिन मेरा महल देख कर खुद का झोपड़ा मत जलाओ क्योंकि मुझे परीक्षा नहीं देनी है.

15.1 ✍FAQ on Writing Style

15.1.1 ✍FAQ: should I write in bullets or in paragraph?

Rule of thumb

⇒ GS Papers : Mostly bullet.

⇒ Essay Paper: Mostly Paragraph. However, they could be scenarios, where you have to give some list, then you can use the bullets e.g. Globalised Economy: ⟶ Subheading: FDI benefits.

⇒ Most of the Toppers who shared their strategy on Youtube, are known to do this. And they have become Topper. That means UPSC did not fail them for doing this. However, some teachers from "Delhi Gharanaa" may differ. Then, as I stated in the prologue itself, I belong to "Gujarat Gharanaa".

15.1.2 ✍Can I use yellow highlighter?

Only blue and black pens allowed. Besides, the papers tend to be so lengthy, the that you will not have the time to use a highlighter after writing the answer. Maximum you can do underline using the ball pen, while writing the answer.

15.1.3 ✍FAQ: Should I write "Conclusion/Way forward" as heading before writing conclusion?

⇒ ideally, there is no need for it. Evaluator is mature enough to know that the last sentences are part of the conclusion.

⇒ However, some Toppers do it and they have become Topper. That means UPSC did not fail them for doing this.

15.1.4 FAQ: Should I write "Introduction" as heading before writing introduction?

⇒ answer similar to above.

15.1.5 FAQ: Should I write Headings in the Body

⇒ ideally, yes, to differentiate the parts of the answer. That will make it easy for the evaluator to rapidly gauge the logical structure of your answer.

⇒ for example: "FDI: features", "FDI: challenges", "FDI: Positive Impact" etc.

15.1.6 Suggested reading to improve English

⇒ NCERT Class11-12 sociology and political science.

⇒ NCERT Class11 India's economic development.

⇒ Chief editor preface of Yojana and Kurukshetra Magazines.

⇒ Economic survey chapters' introductions and conclusions.

⇒ Columns in theHindu/ Indian express. Alternatively theHindu Book of editorials.

⇒ C.Rajagopalachari's translated Mahabharat.

⇒ (pronunciation/idioms) Palki Sharma's News at 9PM on Firstpost Youtube.

15.2 English Grammar and spelling- how important?

⇒ The grammar / spelling error should not be so frequent and so basic/fundamental that it irritates the evaluator.

⇒ e.g. advice vs advise are used in different context. But it may not irritate the evaluator as much as if you make very basic spottable mistake ke "The Finance Minister present the budget every year in February." (presents.)

⇒ Some candidates write the entire paper in small alphabet letters. then it is irritating to read. You must know when to use capital and small.

15.2.1 Subject verb agreement

know when to use "is" or "are": e.g.

⇒ None of them **is** right. All of them **are** right. Neither of them **is** correct.

⇒ The materialism, greed, and corruption **have** increased so much that some businessmen even endanger the lives of people by selling adulterated food and medicine.

15.2.2 Words: its/it's; Former-latter; index-indices

⇒ its = uskaa. (Possessive Noun). It's = short form of "it is".

⇒ **Former and latter:** Corporation tax and GST are two major taxes of the union government. The former is a direct tax and the latter is an indirect tax.

⇒ **Index** ka plural is **indices**. (Indexes is also not wrong, as per some websites. But old professors prefer indices. So, no need to grab their negative attention by writing indexes.)

15.3 Punctuations:

15.3.1 Use of comma

⇒ He eats shoots and leaves. (वो टहनियाँ और पत्तियाँ खाता है)

⇒ He eats , shoots and leaves. (वो खाता है, गोली मारता है और चला जाता है।)

15.3.2 Use of semicolon to join multiple lists/independent clauses

I need to buy apples, oranges, and bananas from the grocery store; milk, bread, and butter from the Amul parlour; and towel, soap, and shaving cream from the department store.

15.3.3 Use of Colon before elaborating the list

Q. Discuss steps to combat black money.

Ans. Here are the measures to combat black money problem in India.

⇒ **Enhancing Tax Administration:** then whatever 2–3 sentences u want to write about it.

⇒ **Strengthening Anti-Corruption Measures**: then whatever 2–3 sentences u want to write about it.

⇒ **Promoting Digital Transactions**: then whatever 2–3 sentences u want to write about it.

15.3.4 Apostrophe 's versus 'of'

Rule of thumb, though may not always be valid

Usage	Example
Living/Human then use "'s"	Mrunal's T-shirt. Mrunal's glasses. Mrunal's lecture, Mrunal's Handout
Non-Living	Parliament of India. Budget of the Union government, leg of the chair, tire of the car.

15.4 Full Forms

Write Full form when u use the word for first time

- Constitution (101st) Amendment Act, 2016 introduced Goods and Services Tax (GST) in India….. Blah blah blah…
- GST has replaced the following indirect taxes of the union and states.

FAQ: what if I cannot recall full form?. e.g. IRDAI, SEBI, etc.

Ans. While it is a good practice to write full form for the first time. But if you can't recall full form, then do not write. It is not a matter of life and death, failure and success in terms of answer evaluation.

15.5 Expression: The Power of Three

⇒ In India, persons with mental disorders often donot get proper treatment due to stigmas, taboos and myths.

⇒ I consider myself fortunate to have been born in the land of Maharashtra, a land that has been blessed by (1) great saints, (2) warriors, and (3) social reformers.

⇒ We are a nation of (1) hopeful, (2) hard-working, and (3) big-hearted people.

⇒ "We must be bold, determined, and hopeful." "We must be strong, smart, and united."

⇒ Optimism is a powerful force. It can help us to (1) overcome challenges, (2) achieve our goals, and (3) make the world a better place.

15.6 Expression: The Power of Contrast

⇒ "We are a nation of bridge-builders, not wall-builders." - Obama.

⇒ "We are a nation of dreamers, not cynics." - Obama.

⇒ "We choose to go to the moon. Not because it was easy, but because it was hard." - John F. Kennedy.

FAQ-Babushona- why did you not give examples of Indian leaders??

Ans. Because impact of emotion gets into get diluted in translation. so using the English examples.
My objective here is to demonstrate some themes/tricks in writing powerful sentences.

15.7 HINDI / GUJARATI ETC MEDIUM KE FAQ

15.7.1 Can I use English words if my mains medium is Hindi/Gujarati etc?

⇒ Do not overdo it so much that irritate the evaluator. e.g. इंडिया में अर्बन पुअर की सिचुएशन बहुत ख़राब है।

⇒ Occasional use is ok. But then also try to write it in Devanagari lipi. e.g. एफआरबीएम एक्ट/क़ानून के तहत सरकार ने राजकोषीय घाटे को क़ाबू में रखना होता है। सीआरआर द्वारा रिज़र्व बैंक मुद्रा आपूर्ति को क़ाबू कर सकता है।

⇒ For very famous terms, you are supposed to know the translation. सकल घरेलू उत्पाद, मुद्रा आपूर्ति, राजस्व आय, आयात, चालू खाता घाटा, निर्यात, महंगाई, बेरोज़गारी, etc।

⇒ for booklist to improve vocabulary of Hindi/ Gujarati- refer to the next section.

15.7.2 Suggested reading to improve Hindi

- My mains economy course contains the translation for the important keywords in Hindi
- hindi Newpaper column e.g. Jansatta. You can download it for free from their website.
- NCERT Political Science/sociology selective study
- NCERT Class11 India's economic development
- Last 3-4 years Economic survey chapters' introductions and conclusions (2023,24,25,26). https://www.indiabudget.gov.in/economicsurvey/
- DD Hindi / BBC Hindi on Youtube
- Chief editor preface in Yojana and Kurukshetra magazines
- NIOS books/PDF
- other subject books in Hindi e.g. Laxmikant, Spectrum etc.

15.7.3 Suggested reading to improve Gujarati

- To improve the Gujarati terminology for a given subject for mains answer writing, read its NIOS textbooks from here:
- Class10 https://nios.ac.in/online-course-material/secondary-courses/gujrati_medium_secondary.aspx
- Class12 https://nios.ac.in/online-course-material/sr-secondary-courses/gujarati_medium_srsecondary.aspx

15.8 BOOKLIST FOR COMPULSORY LANGUAGE PAPERS?

As such for a good student from a decent school should not require any for this.
But, if you don't even know basic rules of grammar and language because A) Your school was really pathetic or B) you yourself were too lazy to study, THEN

- First solve last 3–5 years paper by downloading from UPSC website.
- if you struggle then, here are the list of books
    - Compulsory English by A. P. Bhardwaj
